At the Mascoma Valley Regional School District, we understand our role as a learning institution. Growth happens at all levels; within ourselves, our classrooms, our schools and our district. We recognize that we may not have always done things perfectly and that we can always strive for doing better. Current events have only solidified our commitment to teaching our students about diversity and equality to help prepare them for life outside of Mascoma.

When an issue is brought to our attention, we look to understand it and take any actions needed to correct it or prevent it from happening again. Over the years our School Board and Administration has made sure policies were adopted to support our beliefs. Our curriculum team has worked diligently to find ways to bring appropriate curriculum to our classrooms that benefit our students and teachers. We understand that we cannot undo the past but can work to recognize mistakes, learn from them, and continue to do better.
