

Little Falls Community Schools
Annual Notification Regarding Lead in Water Testing
2025-2026

Little Falls Community Schools Lead in Water management plan specifies that all drinking and cooking water tap locations be tested for the presence of lead at a minimum of every five (5) years. The district has completed its second five (5) year cycle of testing in July of the 2025-2026 school year. All test results will be available to the public for review at: [Home - Little Falls Community Schools \(ISD 482\)](#)

All results are reviewed, and action is taken on any fixture that is found to have the presence of more than 5 ppb (parts per billion) of lead, as recommended by the Minnesota Department of Health and the Minnesota Department of Education.

Anyone interested in more information regarding the District Lead in Water Management Plan is encouraged to contact the district office at 320-632-2000.
