

## Overview

Enhancement Activities provides instruction that augments the *i-Ready Classroom Mathematics* instructional program, with a focus on state-specific standards. You can access Enhancement Activities using the Teacher Toolbox.

There are three types of Enhancement Activities.

**Multi-Day Activities** ► Multi-Day Activities follow the same structure and pedagogy as the lessons students experience every day. Multi-Day Activities are provided when there is a comprehensive state-specific standard that is not addressed by the *i-Ready Classroom Mathematics* instructional program.

**One-Day Activities** ► One-Day Activities consist of a step-by-step teacher-led activity with a focus on hands-on tasks for students. Activity sheets are provided within the activity as needed to support student work. One-Day Activities are provided when there is a less-comprehensive state-specific standard that is not addressed by the *i-Ready Classroom Mathematics* instructional program, or when the scope of a state-specific standard goes beyond the instruction provided.

**Educator Notes** ► Educator Notes provide additional information for the teacher describing how the content in the *i-Ready Classroom Mathematics* instructional program varies from the expectations of the state-specific standards. They also include an example of how the content might be modified in order to better address the state-specific standards. Educator Notes are provided when the state-specific standards require different content limits or vocabulary terms, or when a clear modification can tailor the *i-Ready Classroom Mathematics* instructional program to address state expectations.

The **Table of Contents** in this document indicates where Enhancement Activities have been added into the program, as well as how many days to spend on them. As you consider your overall pacing for the year, lessons that include a range of days indicate places you may want to spend less time in order to create time for instruction on state-specific standards.

Unit Assessment

1

Consider modifying the unit materials to include the following content provided in the **Enhancement Activities**:

- Building a shape when given its defining attributes or name
- Counting and determining the value of a mixed collection of only dimes and pennies
