

Create a Homepage Link (App Button) on your iPhone/iPad

For websites that do not have an app, you can create an icon on your iPhone or iPad home screen with a shortcut (e.g., Veracross Parent Portal).

1. Using your iPhone/iPad Safari web browser, log in to the Stanley Clark Parent Portal at <https://portals.veracross.com/stanleyclark/parent>.
2. Click on the Share icon  at the bottom of your screen and select Add to Home Screen.

3. Rename the page to “SCS Parent Portal” and then click **Add** in the upper-right-hand corner.

4. This will create an “app” icon on your home screen that is a homepage link to the Stanley Clark Portal web page.

5. Press the icon to open the webpage.
