

Education Services at the Anicca Program

Eastern Carver County Schools (ECCS) provides regular and special education services to students enrolled and attending The Anicca Program at Chanhassen High for mental health day treatment.

ECCS will begin to provide instruction immediately after the student is enrolled in The Anicca Program at Chanhassen High School. The Anicca program supports both general education and special education students. Instruction will focus on the core content areas based on the student's transcript, in the areas of English/Language Arts, Science, Mathematics and Social Studies utilizing evidence-based curriculum aligned with MN State Standards. Your child will receive 3.5 hours of education each day, and 3 hours of therapy each day, earning credit towards graduation while enrolled and attending The Anicca Program. The schedule follows ECCS calendar.

Curriculum

Instruction is provided by a dual-licensed general education/special education teacher. Students may also take general education classes within Chanhassen High School, if requested. Standards-based curriculum will be implemented in the classroom to allow students to continue with their studies at their instructional level. Data collection and progress monitoring occurs throughout the time that your child attends The Anicca Program to document progress, completion of work, and growth.

Transportation

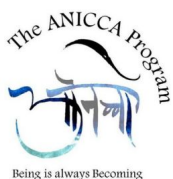

The resident school district (the school district in which the student's legal guardian/parent resides) is responsible for providing transportation to registered care and treatment programs. Please contact them to make arrangements.

Enrollment Process

1. Carver County staff arrange tour/intake, intake is determined by Carver county therapy staff. Upon intake, student is enrolled in The Anicca Program Eastern Carver County Schools (ECCS). Education staff are not typically involved in this process.
2. Carver County staff shares student name, grade, and parent/guardian information with education team.
3. ECCS contacts parent/guardian to review process and collect additional school specific enrollment and background information.
4. During the enrollment process, verification regarding special education services will also occur (when appropriate). If the student receives special education services, the resident district will send most current IEP and evaluation and verbally review IEP goals and objectives as well as services provided.
5. The most recent district of enrollment provides education records.
6. If the student is on an IEP, ECCS will contact parents and reach an agreement about continuation or modification of special education services.
7. A written acknowledgment of services is sent to the resident school district for verification.
8. When exiting The Anicca Program, any updated transcripts or special education due process paperwork will be provided to the resident district, and future district of enrollment. Staff is willing to have a transition meeting with the future district of enrollment.

Data Privacy

There is a clear boundary between the roles/responsibilities of Carver County employees and ECCS employees. No confidential mental health student information is shared with educational staff without a release of information. The Family Education and Privacy Rights Act provide that educational records are available to parents of a student. The data requested on the ECCS registration form will be maintained as part of the student's educational and directory records. Some data is required (such as name, address, and birthdates). Other information requested is not required (such as emergency contacts) but will help us to serve your child more efficiently. The information you provide may be shared with other staff within the school district and the Minnesota Department of Education, whose jobs require access, or other agencies as provided by law. Student educational records are considered private under Minnesota's Data Practices Act. Student directory information is designated per the School District's Data Privacy Policy.
