

Adding your Account to Samsung Board

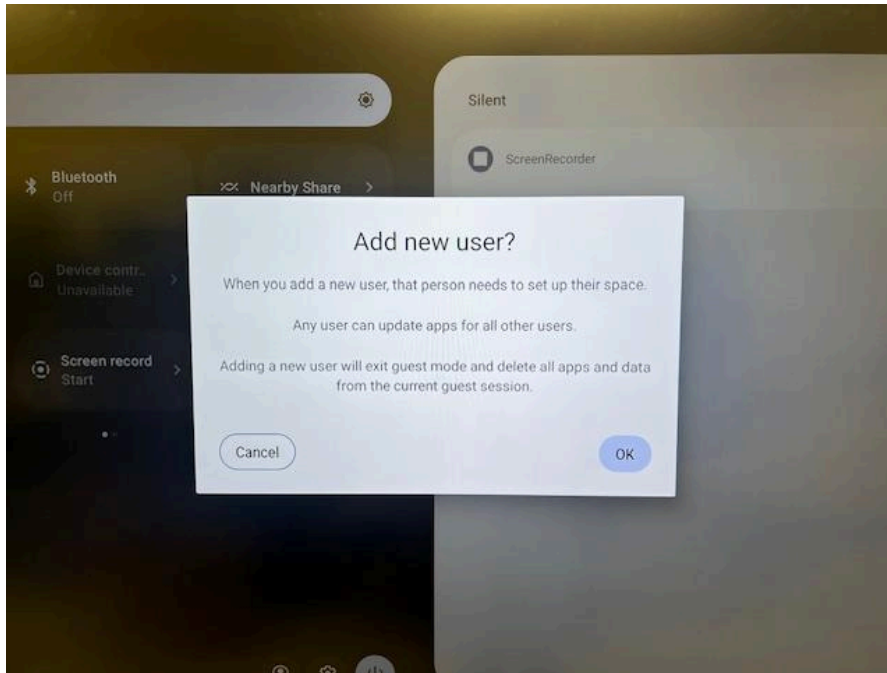

1. On the Home Screen pull down from the top (like you would on a cell phone screen). This should be what you see. Now click the guest icon.

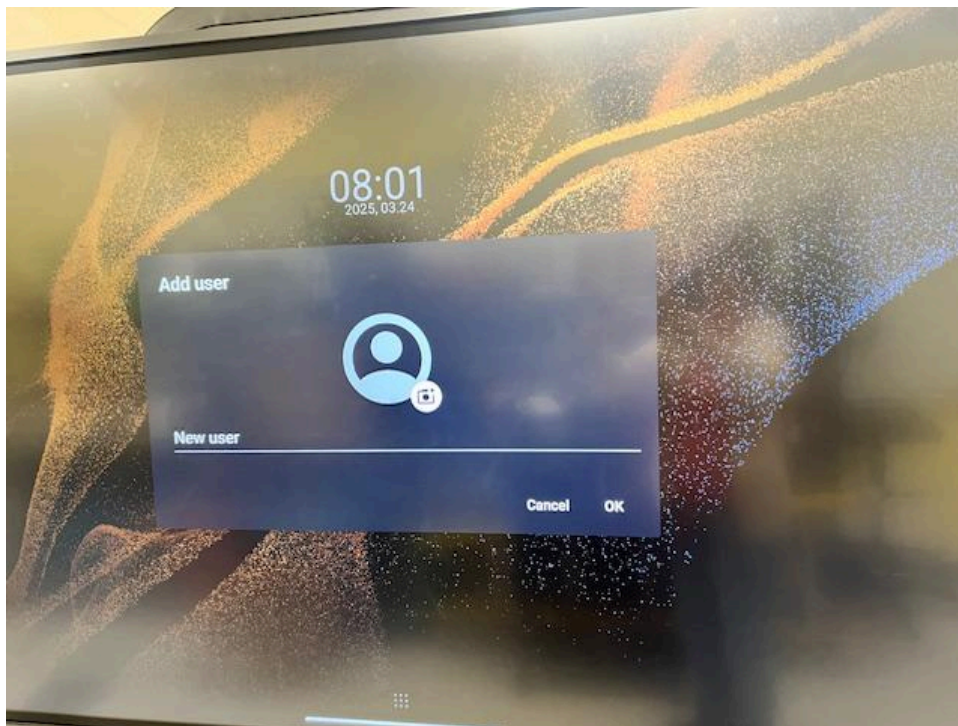

2. Click "Add User"

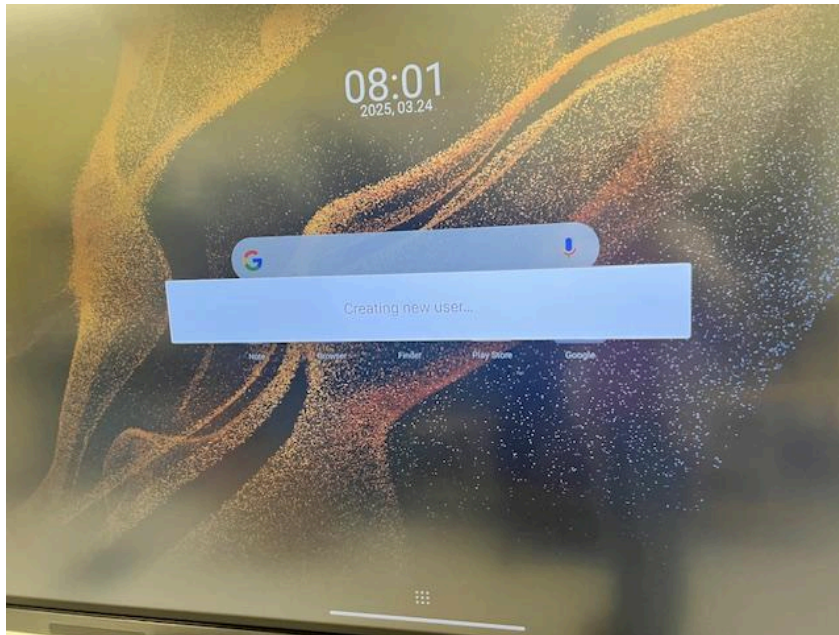

3. This message will appear. Click OK.

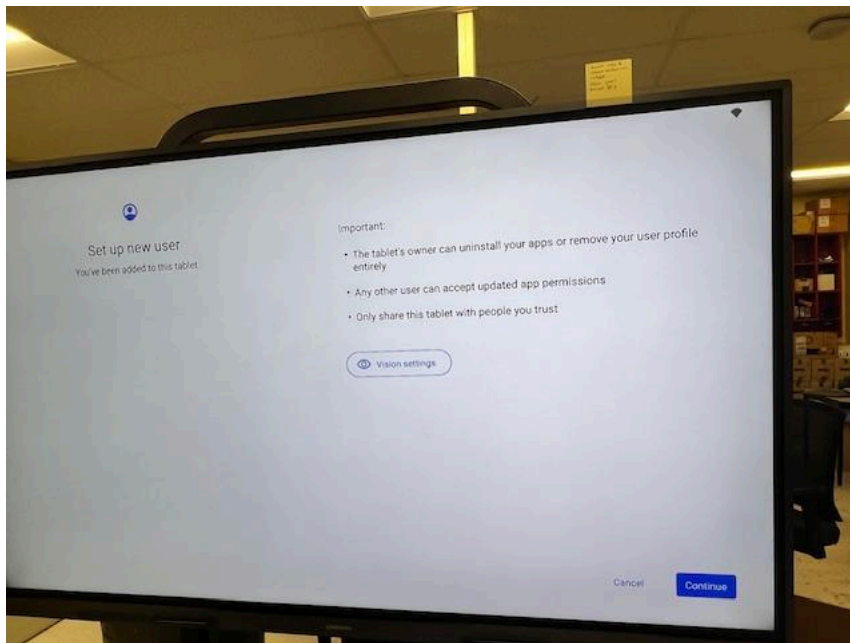

4. Type your name and click "OK"

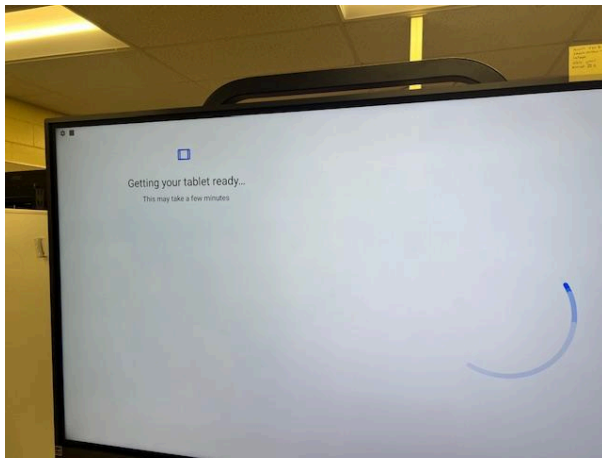

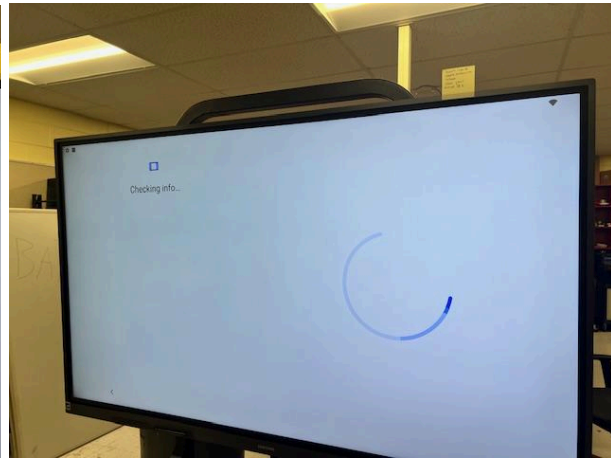

5. This is the screen you will see.

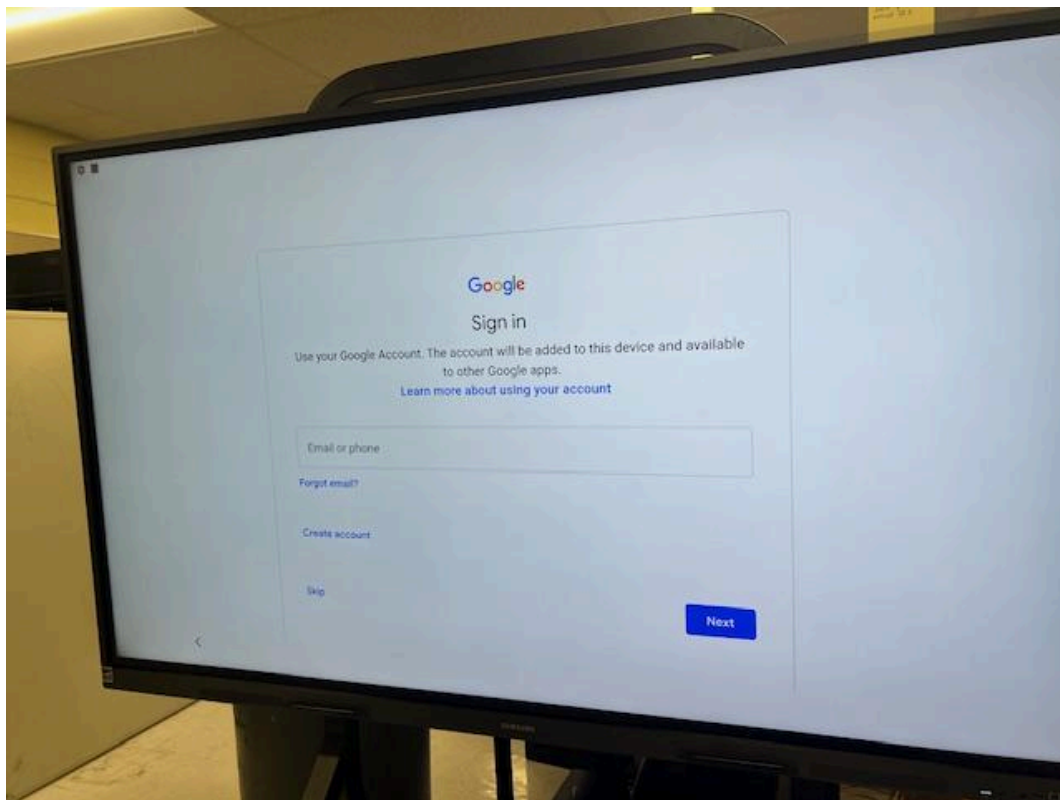

6. On the Set Up New User screen, choose "Continue."

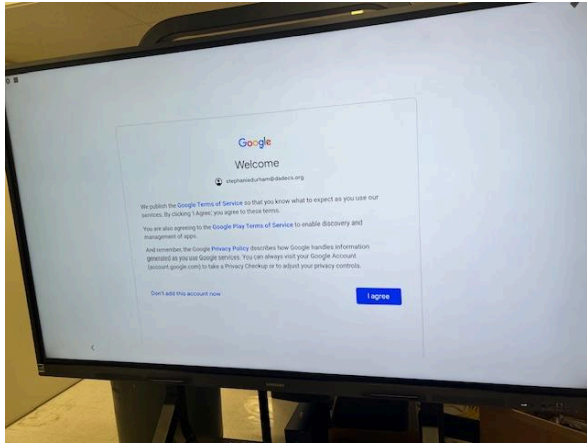

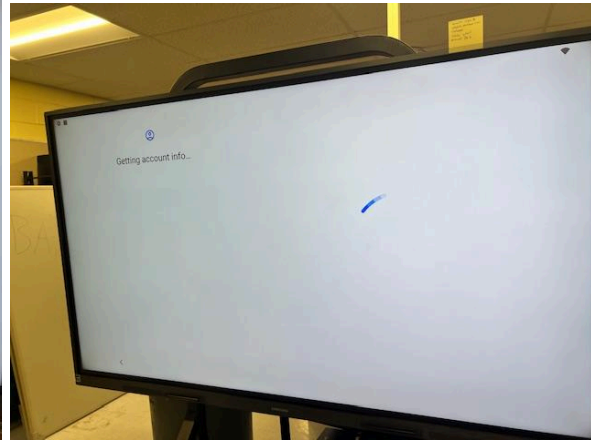

7. This step will take a little bit of time. If you get a message saying “Slow Connection,” just retry. These 2 screens will be shown throughout the process.

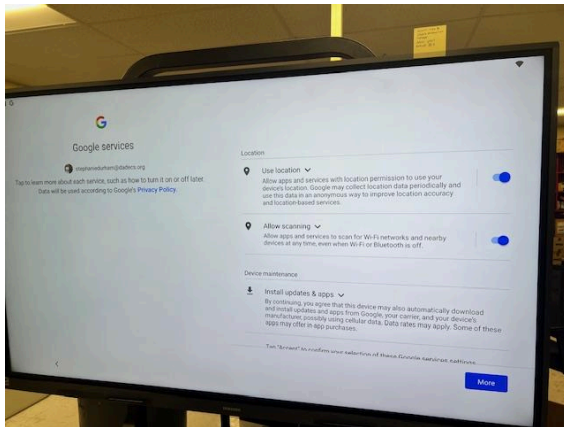

8. Sign into your account using 2-Step Verification.

9. Choose "I agree."

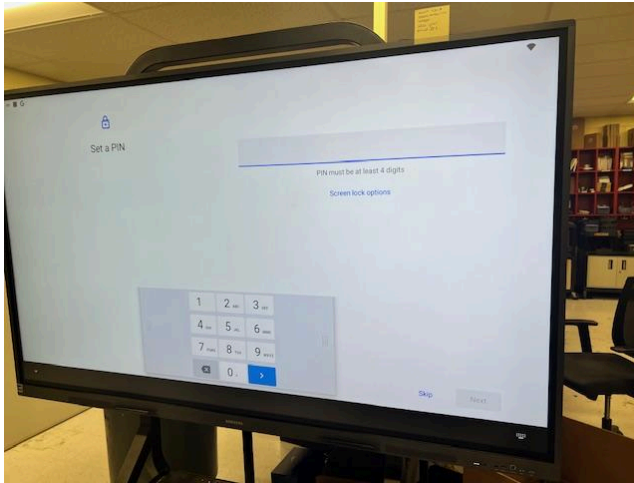

10. Click "More."

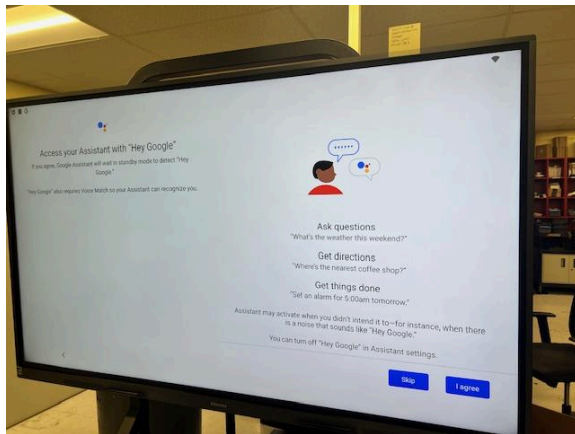

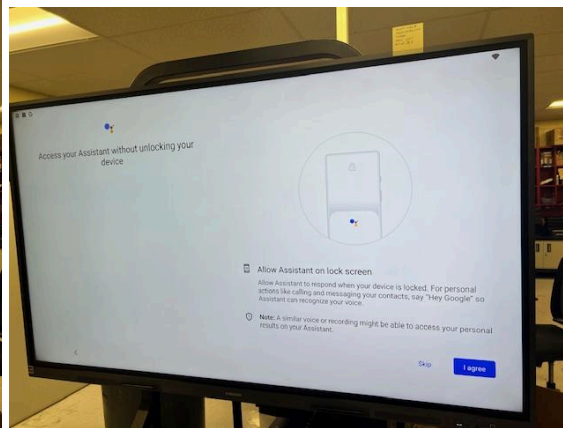

11. Click "Accept."

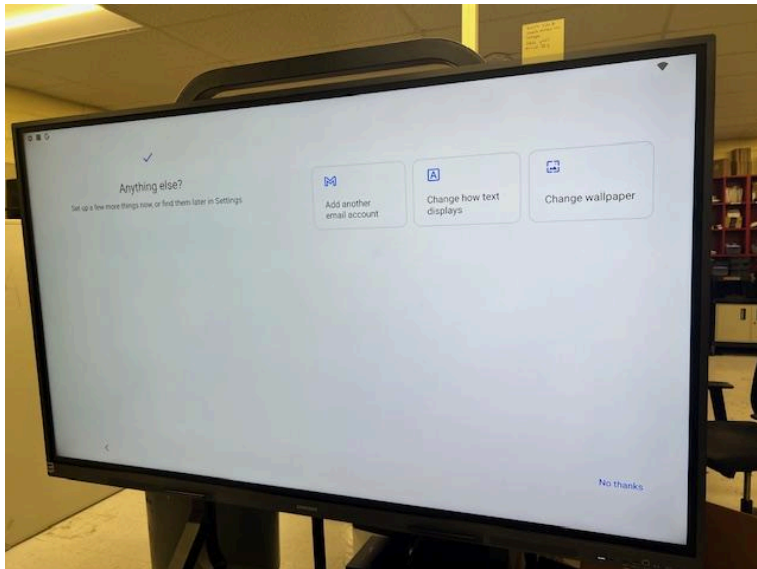

12. Next you will be asked to set up a PIN. Please do so for your protection. You also need to send this PIN to the tech department for any work that may need to be done to the board before school or while you are out of the room. **DO NOT SHARE YOUR PIN WITH ANYONE ELSE, INCLUDING SUBSTITUTES (SHORT TERM OR LONG TERM).**

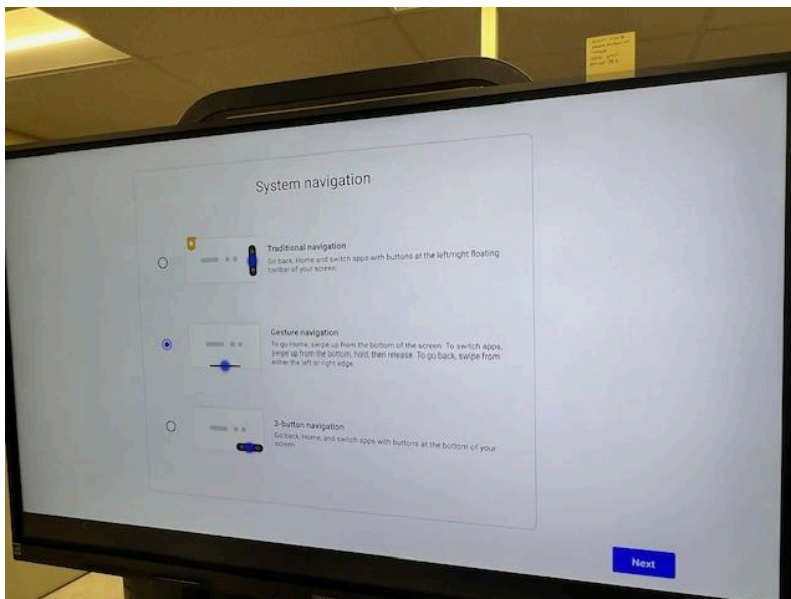

13. Next you will be asked to set up Google Assistant. You do not have to do this at this time. That is up to you. If you do not want to at this time, choose “Skip” and then “Skip” again.

14. Click “No Thanks.”

15. You need to choose your navigation type. It is a personal preference, but we believe “Traditional” is the easiest.

16. You should be ready to go now.
