Climate Change: Earth's Systems (NJSL-S: 5-ESS3-1)

Core Instructional & Supplemental Materials including various levels of Texts

Mystery Science Lessons, Generation Genius, Wonders Reading Program, Brain Pop, Pebble Go, PBS Kids, Interactive Games/Demonstrations, DBQ Projects, and various trade books related to unit topics. See all titles below in Lesson Activities.

Time Frame	12 weeks
Topic	
Space Systems: Stars and the Solar System	
Alignment to Standards	
5-PS2-1 Support an argument that the gravitational force exerted by Earth on objects is directed down. <i>[Clarification Statement: "Down" is a local description of the direction that points toward the center of the spherical Earth.] [Assessment Boundary: Assessment does not include mathematical representation of gravitational force.]</i> 5-ESS1-1 Support an argument that differences in the apparent brightness of the sun compared to other stars is due to their relative distances from Earth. <i>[Assessment Boundary: Assessment is limited to relative distances, not sizes, of stars. Assessment does not include other factors that affect apparent brightness (such as stellar masses, age, stage).]</i> 5-ESS1-2 Represent data in graphical displays to reveal patterns of daily changes in length and direction of shadows, day and night, and the seasonal appearance of some stars in the night sky. <i>[Clarification Statement: Examples of patterns could include the position and motion of Earth with respect to the sun and selected stars that are visible only in particular months.] [Assessment Boundary: Assessment does not include causes of seasons.]</i>	
Learning Objectives and Activities	
Students will understand that..... Stars range greatly in size and distance from Earth, and this can explain their relative brightness.	

Home of the Spartans!
#spartanlegacy

Township of Ocean Schools

Assistant Superintendent
Office of Teaching and Learning

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT : Science

COURSE : Grade 5

- The gravitational force of Earth acting on an object near Earth's surface pulls that object toward the planet's center.
- The length of each day and the direction of shadows are affected by the orbit of both the Earth and the Moon.
- Patterns can be seen in the Earth's orbit around the sun and the moon's orbit around the Earth. These patterns include day and night.

Activities

Mystery Science

- [Spaceship Earth](#)

Generation Genius

- [Balanced & Unbalanced Forces](#)
- [Conservation of Matter](#)
- [Earth's Orbit and Rotation](#)
- [Sun and Other Stars](#)
- [Water Cycle \(3-5 Version\)](#)
- [Water Quality & Distribution](#)

Textbook Readings

- Close Read D 32-33 (rotation/seasons)
- D 38-39 (day & night varies)
- D 74-75 (sun)
- Study Guide B Workbook pg 28 (seasons)

Interactive Lesson Plans

- Explaining why Sun's shadows change throughout the day ["Connecting Shadows with the Sun's altitude"](#)
- Egg Drop Engineering [Part 1](#) , [Part 2](#) (couple days), [Part 3](#), [Part 4](#) (includes a rubric)
- PBS [Gravity and Falling Objects](#) (approx 2 day lesson & investigation)

enVision Math and Science Connections

- [Earth's Rotation](#) Topic 14 pg 773
- [Solar Energy](#) Topic 4 pg 163

Wonders

- Leveled Reader: Stargazing

Brain Pop

DEPARTMENT : Science

COURSE : Grade 5

Interdisciplinary Connections

NJSLS: ELA

- **RL.CR.5.1.** Quote accurately from a literary text when explaining what the text says explicitly and make relevant connections when drawing inferences from the text.
- **RI.CI.5.2.** Determine the central idea of an informational text and explain how it is supported by key details; summarize the text.
- **RI.AA.5.7.** Explain how an author uses reasons and evidence to support particular points in a text, identifying which reasons and evidence support which point(s).
- **W.AW.5.1** Write opinion pieces on topics or texts, supporting a point of view with reasons and information.
- **SL.UM.5.5** Include multimedia components (e.g., graphics, sound) and visual displays in presentations when appropriate to enhance the development of main ideas or themes.

NJSLS: Mathematics

- **MP.2** Reason abstractly and quantitatively. (5-ESS1-1),(5-ESS1-2)
- **MP.4** Model with mathematics. (5-ESS1-1),(5-ESS1-2)
- **5.NBT.A.2** Explain patterns in the number of zeros of the product when multiplying a number by powers of 10, and explain patterns in the placement of the decimal point when a decimal is multiplied or divided by a power of 10. Use whole-number exponents to denote powers of 10. (5-ESS1-1)
- **5.G.A.2** Represent real world and mathematical problems by graphing points in the first quadrant of the coordinate plane, and interpret coordinate values of points in the context of the situation. (5-ESS1-2)

NJSLS: Computer Science and Design Thinking

- **8.1.5.IC.1:** Identify computing technologies that have impacted how individuals live and work and describe the factors that influenced the changes.
- **8.1.5.IC.2:** Identify possible ways to improve the accessibility and usability of computing technologies to address the diverse needs and wants of users.
- **8.1.5.DA.5:** Propose cause and effect relationships, predict outcomes, or communicate ideas using data.

Career Readiness, Life Literacies, and Key Skills

- **9.2.5.CAP.4:** Explain the reasons why some jobs and careers require specific training, skills, and certification (e.g., life guards, child care, medicine, education) and examples of these requirements.

Technology Integration

Home of the Spartans!

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT : Science

COURSE : Grade 5

- **9.4.5.CI.3:** Participate in a brainstorming session with individuals with diverse perspectives to expand one's thinking about a topic of curiosity.
- **9.4.5.IML.3:** Represent the same data in multiple visual formats in order to tell a story about the data.

Career Education

CRP 8. SW utilize critical thinking to make sense of problems and persevere in solving them by completing the Mystery Science challenge.

CRP 11. SW use technology to enhance productivity by accessing the following online resources:

- [Amazing Water & Sound Experiment](#)
- [Sound](#)
- [BrainPop Waves](#)
- [BrainPop Light](#)
- [Brainpop: Sound](#)
- [Waves](#)
- [Dolphin Sound Echoes](#)

Time Frame	8 weeks
Topic	
Earth Systems	
Alignment to Standards	
5-ESS2-1 Develop a model using an example to describe ways the geosphere, biosphere, hydrosphere, and/or atmosphere interact. <i>[Clarification Statement: Examples could include the influence of the ocean on ecosystems, landform shape, and climate; the influence of the atmosphere on landforms and ecosystems through weather and climate; and the influence of mountain ranges on winds and clouds in the atmosphere. The geosphere, hydrosphere, atmosphere, and biosphere are each a system.] [Assessment Boundary: Assessment is limited to the interactions of two systems at a time.]</i>	
5-ESS2-2 Describe and graph the amounts of salt water and fresh water in various reservoirs to provide evidence about the distribution of water on Earth. <i>[Assessment Boundary: Assessment is limited to oceans, lakes, rivers, glaciers, ground water, and polar ice caps, and does not include the atmosphere.]</i>	
5-ESS3-1 Obtain and combine information about ways individual communities use science ideas to protect the Earth's resources, environment, and address climate change issues.	

Home of the Spartans!

Township of Ocean Schools

Assistant Superintendent
Office of Teaching and Learning

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT : Science

COURSE : Grade 5

3-5-ETS1-1 Define a simple design problem reflecting a need or a want that includes specified criteria for success and constraints on materials, time, or cost.

3-5-ETS1-2 Generate and compare multiple possible solutions to a problem based on how well each is likely to meet the criteria and constraints of the problem.

3-5-ETS1-3 Plan and carry out fair tests in which variables are controlled and failure points are considered to identify aspects of a model or prototype that can be improved.

Learning Objectives and Activities

Students will understand that.....

- Some events happen very quickly; others occur very slowly over time.
- Most of Earth's water is in the ocean and much of the Earth's freshwater is in glaciers or underground.
- The Earth's systems are the geosphere (solid and molten rock, soils, and sediments), the hydrosphere (water and ice), the atmosphere (air), and the biosphere (living things, including humans).
- The Earth's systems interact in a variety of ways that affect earth's surface materials and processes.
- The ocean supports a variety of ecosystems and organisms, shapes landforms and influences climate.
- The atmosphere affects landforms and ecosystems through weather and climate.
- Winds and clouds in the atmosphere interact with the landforms to determine patterns of weather.
- Human activities in agriculture, industry, and everyday life have had major effects on the land, vegetation, streams, ocean, air, and even outer space.
- Humans and other organisms will be affected in many different ways if Earth's global mean temperature continues to rise.

#spartanlegacy

Township of Ocean Schools

Assistant Superintendent
Office of Teaching and Learning

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT : Science

COURSE : Grade 5

- Food provides animals with the materials and energy they need for body repair, growth, warmth and motion. Plants acquire material for growth chiefly from air, water, and process matter and obtain energy from sunlight, which is used to maintain conditions necessary for survival.
- The food of almost any animal can be traced back to plants. Organisms are related in food webs in which some animals eat plants for food and other animals eat the animals that eat plants, while decomposers restore some materials back to the soil.
- Matter cycles between the air and soil and among organisms as they live and die. Energy can be “produced,” “used,” or “released” by converting stored energy. Plants capture energy from sunlight, which can later be used as fuel or food.
- The energy released from food was once energy from the sun that was captured by plants in the chemical process that forms plant matter.
- A healthy ecosystem is one in which multiple species of different types are each able to meet their needs in a relatively stable web of life.
- Matter that is not food (air, water, decomposed materials in soil) is changed by plants into matter that is food.

Activities

Mystery Science Lessons

DEPARTMENT : Science

COURSE : Grade 5

- **8.1.5.DA.5:** Propose cause and effect relationships, predict outcomes, or communicate ideas using data.

Career Readiness, Life Literacies, and Key Skills

Technology Integration

- **9.4.5.CT.1:** Identify and gather relevant data that will aid in the problem-solving process.
- **9.4.5.CT.4:** Apply critical thinking and problem-solving strategies to different types of problems such as personal, academic, community and global.
- **9.4.5.IML.2:** Create a visual representation to organize information about a problem or issue.

Career Education

CRP 8. SW utilize critical thinking to make sense of problems and persevere in solving them by completing the Mystery Science challenge.

CRP 11. SW use technology to enhance productivity by accessing the following online resources:

- [Amazing Water & Sound Experiment](#)
- [Sound](#)
- [BrainPop Waves](#)
- [BrainPop Light](#)
- [Brainpop: Sound](#)
- [Waves](#)
- [Dolphin Sound Echoes](#)
- [Bill Nye the Science Guy on Light](#)

Time Frame	10 weeks
Topic	
Structures and Property of Matter	
Alignment to Standards

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT : Science

COURSE : Grade 5

5-PS1-1 Develop a model to describe that matter is made of particles too small to be seen.

[Clarification Statement: Examples of evidence supporting a model could include adding air to expand a basketball, compressing air in a syringe, dissolving sugar in water, and evaporating salt water.] [Assessment Boundary: Assessment does not include the atomic-scale mechanism of evaporation and condensation or defining the unseen particles.]

5-PS1-2 Measure and graph quantities to provide evidence that regardless of the type of change that occurs when heating, cooling, or mixing substances, the total weight of matter is conserved. *[Clarification Statement: Examples of reactions or changes could include phase changes, dissolving, and mixing that form new substances.] [Assessment Boundary: Assessment does not include distinguishing mass and weight.]*

5-PS1-3 Make observations and measurements to identify materials based on their properties. *[Clarification Statement: Examples of materials to be identified could include baking soda and other powders, metals, minerals, and liquids. Examples of properties could include color, hardness, reflectivity, electrical conductivity, thermal conductivity, response to magnetic forces, and solubility; density is not intended as an identifiable property.] [Assessment Boundary: Assessment does not include density or distinguishing mass and weight.]*

5-PS1-4 Conduct an investigation to determine whether the mixing of two or more substances results in new substances.

Learning Objectives and Activities

Students will understand that...

- Since matter exists as particles that are too small to see, matter is always conserved even if it seems to disappear. Measurements of a variety of observable properties can be used to identify particular materials.
- Chemical reactions occur when substances are mixed together and a new substance is formed. The properties of a chemical reaction will be different, but the total mass remains the same.
- Examples of observable properties could include color, hardness, reflectivity, electrical conductivity, thermal conductivity, response.

Activities

Mystery Science

- [Chemical Magic](#)

Generation Genius

- [Particle Nature of Matter](#)
- [Properties of Matter](#)
- [Chemical vs. Physical Changes](#)

Wonders Reading

Office of Teaching and Learning

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT : Science

COURSE : Grade 5

- "Minerals" Unit 4 Week 4

Houghton Mifflin Science: Unit E

- **Chapter 12-The Structure of Matter**
 - Lesson 1-What Are Elements?
 - Lesson 3-What Are Compounds?
- **Chapter 13-Characteristics of Matter**
 - Lesson 1- How Can Materials Be Identified?
 - Lesson 2-How Does Matter Change?
 - Lesson 3-What are Solutions and Mixtures?
 - [Why Does Matter Matter?](#) Close Read with Assessment

Additional Lesson Plans

- Prezi: [Science Structures and Properties of Matter](#)
- [Dissolving Salt lab](#): dissolving DOES NOT create something new
- Using a [triple beam balance](#) to test if matter changes weight after melting and freezing
- Investigating [changes of state](#) with ice cubes
- Students make glue balls, lava lamps, origami dogs, and many more exciting things to help them [differentiate between physical and chemical changes](#).
- [Structure and Properties of Matter](#) Lesson Plans
- [Bubble Bomb](#)- baking soda, vinegar, plastic bag reaction

Virtual Labs & Games

- ENGAGE: Opening Activity – Access Prior Learning / Stimulate Interest / Generate Questions Share internet website ["Strange Matter"](#)
- This site has the embedded States of Matter Video, Matter Sorter Game, Group Classroom Lesson and Review Quiz. Also, students will use the Cause and Effect Graphic Organizer as a recording device for the [States of Matter](#).
- Virtual [Phases of Matter](#) Gizmo with [vocabulary](#) and [student exploration sheet](#)
- Virtual Lab on [Properties of Materials](#)
- Virtual lab on [physical and chemical](#) changes
- Virtual Lab on [Mystery Powder Analysis](#) with [vocabulary](#) and [student exploration sheet](#)
- Virtual Lab on [Mineral Identification](#) using physical properties with [vocabulary](#) and [student exploration sheet](#)

Videos

- BrainPop- [States of Matter](#)
- BrainPop-[Matter Changing States](#)
- Bill Nye-[3 Phases of Matter](#)

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT : Science

COURSE : Grade 5

- Matter Compilation: [Crash Course Kids](#)
- Chemical Changes: [Crash Course Kids](#)
- Oobleck and Non-Newtonian Fluids: [Crash Course Kids](#)
(to be used in conjunction with mystery science 3)
- Bozeman Science: [Structure and Properties of Matter](#)
- Study Jams: [Matter](#)

EnVision Math and Science Connections

- Topic 6: [States of Water](#)
- Topic 8: [Kitchen Chemistry](#)

STEAM

- Engineering Activity using hot air balloons: [How heat can change air?](#)

Additional Reading

- Readworks (with vocabulary and questions) [Matter Is Everywhere](#)
- [Chemistry for Kids](#)
- [Why is the Statue of Liberty Green?](#)
- [Matter](#)
- Adventure on [Hot Air Balloons](#)
- Bartholomew and the Oobleck by Dr. Seuss
(in conjunction with Mystery Science 3)

Assessments

Formative Assessments

- Student Lab Sheets from Better Lesson
- [States of Matter](#) formal quiz after Close Read
- Formative Monitoring (Questioning / Discussion)

Summative Assessments

- Mystery Science Assessment pages for [Matter](#)
- Houghton Mifflin Science Assessments for chapters 12 and 13 (see Zen Room)
- [Phases of Matter](#) formal assessment with answer key
- [Optional Unit Assessments](#) from Better Lesson

Alternative Assessments

- Engineering Activity using hot air balloons: [How heat can change air?](#)
- EnVisions - Math and Science Connection
 - o Topic 6: [States of Water](#)
 - o Topic 8: [Kitchen Chemistry](#)

DEPARTMENT : Science

COURSE : Grade 5

Interdisciplinary Connections

NJSLS: ELA

- **RI.CR.5.1.** Quote accurately from an informational text when explaining what the text says explicitly and make relevant connections when drawing inferences from the text.
- **RL.MF.5.6.** Analyze how visual and multimedia elements contribute to the meaning, tone, or beauty of a text (e.g., graphic novel, multimedia presentation of fiction, folktale, myth, poem).
- **RI.CI.5.2.** Determine the central idea of an informational text and explain how it is supported by key details; summarize the text.
- **W.IW.5.2.** Write informative/explanatory texts to examine a topic and convey ideas and information clearly.
- **W.SE.5.6** Gather relevant information from multiple valid and reliable print and digital sources; summarize or paraphrase information in notes and finished work, making note of any similarities and differences among ideas presented; and provide a list of sources.
- **W.WR.5.5.** Establish a central idea about a topic, investigation, issue or event and use several sources to support the proposed central idea.

NJSLS: Mathematics

- **MP.2** Reason abstractly and quantitatively. (5-PS1-1)
- **MP.4** Model with mathematics. (5-PS1-1)
- **5.NBT.A.1** Explain patterns in the number of zeros of the product when multiplying a number by powers of 10, and explain patterns in the placement of the decimal point when a decimal is multiplied or divided by a power of 10. Use whole-number exponents to denote powers of 10. (5-PS1-1)
- **5.NF.B.7** Apply and extend previous understandings of division to divide unit fractions by whole numbers and whole numbers by unit fractions. (5-PS1-1)
- **5.MD.C.3** Recognize volume as an attribute of solid figures and understand concepts of volume measurement. (5-PS1- 1)
- **5.MD.C.4** Measure volumes by counting unit cubes, using cubic cm, cubic in, cubic ft, and improvised units. (5-PS1- 1)

NJSLS: Computer Science and Design Thinking

- **8.1.5.DA.3:** Organize and present collected data visually to communicate insights gained from different views of the data.
- **8.1.5.DA.5:** Propose cause and effect relationships, predict outcomes, or communicate ideas using data.

Career Readiness, Life Literacies, and Key Skills

Home of the Spartans!

Township of Ocean Schools

Assistant Superintendent
Office of Teaching and Learning

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT : Science

COURSE : Grade 5

Technology Integration

- **9.4.5.CI.3:** Participate in a brainstorming session with individuals with diverse perspectives to expand one's thinking about a topic of curiosity.
- **9.4.5.CI.4:** Research the development process of a product and identify the role of failure as a part of the creative process.
- **9.4.5.IML.2:** Create a visual representation to organize information about a problem or issue.

Career Education

CRP 8. SW utilize critical thinking to make sense of problems and persevere in solving them by completing the Mystery Science challenge.

CRP 11. SW use technology to enhance productivity by accessing the following online resources:

Modifications (ELL, Special Education, At Risk Students, Gifted & Talented, & 504 Plans)

ELL:

- Work toward longer passages as skills in English increase
- Use visuals
- Introduce key vocabulary before lesson
- Teacher models reading aloud daily
- Provide peer tutoring
- Use of Bilingual Dictionary
- Guided notes and/or scaffold outline for written assignments
- Provide students with English Learner leveled readers.

Supports for Students With IEPs:

- Allow extra time to complete assignments or tests
- Guided notes and/or scaffold outline for written assignments
- Work in a small group
- Allow answers to be given orally or dictated
- Use large print books, Braille, or books on CD (digital text)
- Follow all IEP modifications

Home of the Spartans!

Township of Ocean Schools

Assistant Superintendent
Office of Teaching and Learning

SPARTAN MISSION:

Meeting the needs of all students with a proud tradition of academic excellence.

DEPARTMENT : Science

COURSE : Grade 5

At-Risk Students:

- Guided notes and/or scaffold outline for written assignments
- Introduce key vocabulary before lesson
- Work in a small group
- Lesson taught again using a differentiated approach
- Allow answers to be given orally or dictated
- Use visuals / Anchor Charts
- Leveled texts according to ability

Gifted and Talented:

- Create an enhanced set of introductory activities (e.g. advance organizers, concept maps, concept puzzles)
- Provide options, alternatives and choices to differentiate and broaden the curriculum
- Organize and offer flexible small group learning activities
- Provide whole group enrichment explorations
- Teach cognitive and methodological skills
- Use center, stations, or contracts
- Organize integrated problem-solving simulations
- Propose interest-based extension activities
- Expose students to beyond level texts.

Supports for Students With 504 Plans:

- Follow all the 504 plan modifications
- Text to speech/audio recorded selections
- Amplification system as needed
- Leveled texts according to ability
- Fine motor skill stations embedded in rotation as needed
- Modified or constrained spelling word lists
- Provide anchor charts with high frequency words and phonemic patterns
