ELA Project	
Alignment to Standards	
LA.RL.K.2 - With prompting and support, retell familiar stories, including key details (e.g., who, what, where, when, why, how). LA.RL.K.3 - With prompting and support, identify characters, settings, and major events in a story. LA.RL.K.9 - With prompting and support, compare and contrast the adventures and experiences of characters in familiar stories.	

LA.W.K.3 - Use a combination of drawing, dictating, and writing to narrate a single event or several loosely linked events, tell about the events in the order in which they occurred, and provide a reaction to what happened.

LA.W.K.5 - With guidance and support from adults, strengthen writing through response and self-reflection using questions and suggestions from peers (e.g., adding details).

LA.W.K.8 - With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.

LA.SL.K.5 - Add drawings or other visual displays to descriptions as desired to provide additional detail.

Learning Objectives and Activities

Students will understand that...

- Successful projects follow a guided list of steps.
- Thinking takes time.
- Listening is an active process.
- Responding and asking appropriate questions is a skill.
- The Writing Process involves a series of steps to be followed sequentially.

Activities...

- Fairy Tale endings
 - Students will listen to various readings of fairy tales
 - Students will work in partnerships to create a main character for their own “fairy tale” and draw the character
 - Students will be given a “problem” for their character
 - Student pairs will brainstorm solutions for their character to solve the problem
 - Students will draw pictures depicting how problem is solved
 - Students will narrate while being recorded with illustrations

Assessments

Formative:

- Self assessment
- Individual critique
- Peer conferences
- Teacher/student conferences.

Summative:

- Writing rubric
- “I now know” journal

STEAM Hands-on Lego Challenges	
Alignment to Standards	
VA.K-2.1.5.2.Cr1a - [<i>Performance Expectation</i>] - Engage in individual and collaborative exploration of materials and ideas through multiple approaches, from imaginative play to brainstorming, to solve art and design problems. CS.K-2.8.1.2.AP.4 - [<i>Performance Expectation</i>] - Break down a task into a sequence of steps. CS.K-2.8.2.2.ED.2 - [<i>Performance Expectation</i>] - Collaborate to solve a simple problem, or to illustrate how to build a product using the design process. CS.K-2.8.2.2.ED.4 - [<i>Performance Expectation</i>] - Identify constraints and their role in the engineering design process. SCI.K-2-ETS1-1 - [<i>Performance Expectation</i>] - Ask questions, make observations, and gather information about a situation people want to change to define a simple problem that can be solved through the development of a new or improved object or tool.	
Learning Objectives and Activities	
<i>Students will understand that...</i> • There are specific steps in the engineering design process; identify the need or problem, research the problem, develop possible solutions, select the best possible design, select the best possible solution(s), construct a prototype, test and evaluate, communicate the solution(s), and redesign. • Construction of the Lego challenge card will take creative thinking and construct knowledge.
