

Notice of Electronic Device Monitoring

R.C. § 3319.327, effective October 24, 2024, requires school districts to provide annual notice to students and parents if districts engage in monitoring of school-issued electronic devices.

The District may at times elect to monitor school-issued electronic devices. If the district's monitoring detects a threat to life or safety, the District will, within seventy-two hours of the student's access of the device, notify the student's parent and provide a written description of the triggering circumstance, the features of the device that the student accessed, and a description of the threat. If the notice itself would pose a threat to life or safety, the notice is not required to be given until 72 hours after the threat of the notice has ceased.
