7:00–8:30 pm

How Can You Support Your Student This Year?

Parent partnerships are key!

Math

- Parents should also be keeping track of how their child is performing in their grade level math and ELA class because their performance in those classes will be factored into their possible exit from the program.
- Students should memorize multiplication facts
- Parents should be aware of the online resources we use to track math progress (IXL)

English Language Arts

- Parents should be encouraging their children to read every night. Suggested time: twenty minutes
- Ask your child to share what they are reading! What stands out? What characters or plot events are of interest? Can they make connections to other books, movies, TV shows, etc., that you've enjoyed as a family?
- Fun activities: cooking as a family
