

Healthcare Pathway

Natomas High School

Healthcare: The Health Science and Medical Technology Pathway is a comprehensive, interdisciplinary program designed to prepare students for a wide spectrum of careers within the healthcare sector. Through an integrated approach that combines classroom instruction, laboratory-based simulations and supervised clinical experiences, students develop a robust foundation in patient care practices, medical technologies, and effective professional communication.

The curriculum emphasizes the cultivation of essential healthcare competencies, including critical thinking, collaborative teamwork, empathy, and adaptability—skills that are vital for success in dynamic and patient-centered environments. By engaging with diverse facets of the healthcare field, students gain a broad and informed understanding of potential career pathways, enabling them to make thoughtful and strategic decisions regarding their future professional and academic pursuits.
