

Music Production Pathway

Natomas High School

Music Production & Recording Arts: The music production pathway offers students a comprehensive foundation in audio production through project-based learning conducted within a professional recording studio environment. Leveraging industry-standard tools—including microphones, audio interfaces, MIDI controllers, instruments, and Digital Audio Workstations—students gain practical experience across both digital and analog recording platforms. The curriculum emphasizes skill development in recording, mixing, and mastering original compositions, as well as navigating the processes involved in distributing music through digital platforms. In addition to technical proficiency, students cultivate key interpersonal and collaborative skills essential for success in the music industry. The program also integrates instruction in studio operations, encompassing business plan development, client relations, pricing strategies, and professional standards for managing a successful music production enterprise.
