

# Connections

## A Literacy Partnership

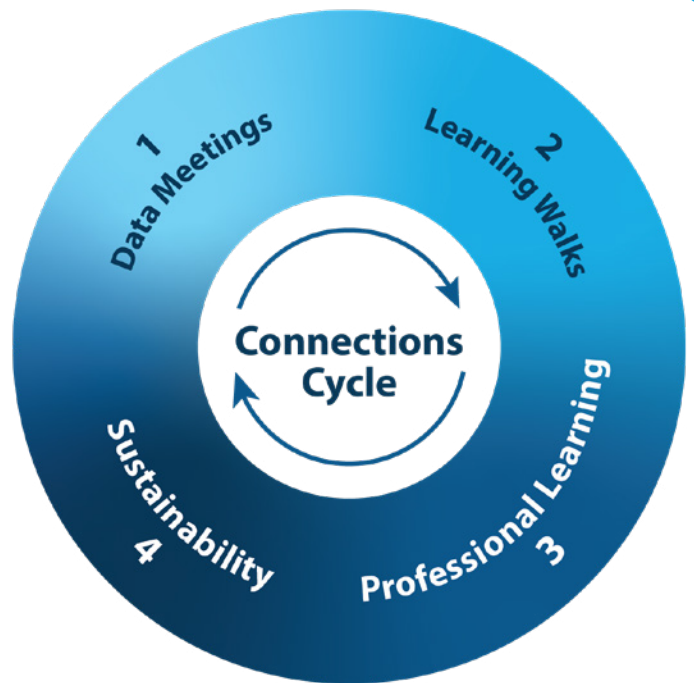

Join the Project ARISE team in a dynamic, data-driven partnership designed to support teachers through collaborative learning cycles that lead to stronger, more equitable literacy outcomes for all students.

### Why Participate

- **Responsive, Research-Based Support:** Equip your teachers with evidence-based strategies that directly respond to student data and classroom needs.
- **Focused Support for Multilingual Learners:** Receive targeted guidance for delivering integrated and designated English language development instruction that meets the needs of diverse learners.
- **Tier 1 Classwide Interventions:** Leverage tools such as RDRS data (K-2) to implement proactive, classroom-wide literacy supports.
- **Sustainable Impact:** Develop systems and structures that ensure long-term success beyond the two-year cycle.

*"Your passion, expertise, and ability to make the content both approachable and immediately applicable were so well received. It was clear how much our teachers valued and connected with the sessions."*
