Good afternoon,

I had a parent on Hilton Head Island reach out to me and ask me about the gym floor at Hilton Head school for Creative Arts to find out if that has ever been removed after it was tested and contained mercury levels. They also asked when the last time the area was tested?

So I guess if you could send me the test results and the last report as to what was going on with that floor. And what is needed to be done to keep the area from bleeding mercury?

I greatly appreciate anything you can get to me.

Thank you!

Regards,

David Cook
