“Why are we notified every time there’s an ambulance at the school?”

You are correct to notice that whenever an ambulance is called to one of our school buildings, we make it a point to contact the families involved and inform them of the situation. While many incidents requiring medical attention are minor and resolved quickly, we believe this practice serves several important purposes:

1. Promoting Transparency: We want you to feel confident that you are always informed about events that might affect your child or our school community.
2. Minimizing Confusion: Seeing an ambulance at a school can understandably raise questions. By reaching out proactively, we can provide accurate information and reassure families about the steps we are taking.
3. Fostering Trust: We value the trust you place in us to care for your children. Keeping you informed ensures that you remain a key partner in our shared goal of providing a safe learning environment.

More often than not, calling an ambulance is a precautionary measure to ensure proper medical evaluation. In every case, we follow established protocols to respond appropriately and prioritize the health and safety of everyone on campus.
