Generative AI (Artificial Intelligence)

The Board of Education is committed to providing our students with the most innovative and effective educational experiences to foster high levels of learning and opportunities for self-expression. As our schools prepare students for a future that demands adaptability, critical thinking and digital literacy, we recognize the potential of generative Artificial Intelligence (AI) and other related technology tools.

As with all technologies, users must be mindful of and adhere to all considerations ensuring responsible and ethical use, especially as it relates to mitigating bias, promoting transparency, and ensuring the benefits of AI are accessible to all students.

While ensuring the responsible use for those interacting with and creating content from generative AI technologies, the Board underscores its commitment to fostering a dynamic and engaging learning environment that leverages the advances in AI to enhance student learning outcomes and equip students with the skills and dispositions needed for success in the digital age.
