

Premium High School Program

Are you ready to
Shape Your Future?

Welcome to the AISK Premium High School Program—

An incredible educational adventure designed to help you discover your potential and set you up for future success. Big decisions are on the horizon, and they're all about getting you the university qualifications that match your skills and interests.

AISK has curated three extraordinary courses for university preparation that you may tailor to your liking. With the Premium High School Program, each course is customized to your interests and how much of a challenge you're ready to take on. It's all about making your university preparations and qualifications cater specifically to you!

The hallmarks of all three courses include all the added benefits necessary to serve our students:

Individualized Learning:

AISK recognizes every student's uniqueness, offering a curriculum that encourages self-discovery and personal growth.

Emphasis on Core Subjects:

Our program focuses on essential subjects like Mathematics, Language, Humanities, Science, and Modern Language, aligning with global university requirements.

Holistic Development:

Beyond academics, our iRise Student Success Program fosters vital skills such as organization, teamwork, and problem-solving, essential for higher education and the modern workforce.

Flexibility:

Our flexible learning environment empowers students to shape their education, whether pursuing the IBDP or specific subjects.

Experienced Faculty:

AISK boasts experienced teachers and college counselors providing personalized support.

College Counseling:

All courses include guidance on resumes, college applications, essays, and university selection, ensuring students are prepared for the next step.

SAT Preparation:

Our in-school SAT prep empowers students to excel, offering support, and boosting confidence for future opportunities.

Choose Your Challenge | Create Your Course

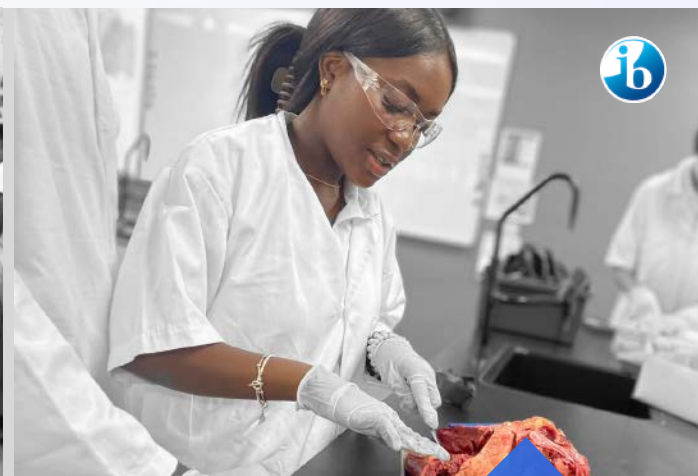

Overall, the AISK Premium High School Program has three well-rounded and student-focused courses that deliver an educational experience that aims to prepare students for success in their academic and professional futures. It encourages them to explore their interests, excel academically, and develop essential life skills.

The Premium High School Course

Students study core requirements essential for university admissions in the Junior Year of High School (the year before graduation).

The course of study includes Mathematics, Science, Social Science, Modern Language, English, personal and professional Skills, and either a subject in the Performing or Visual Arts or an additional science subject. A mandatory service component is also part of this course, leading to a U.S. High School Diploma award.

IB Courses

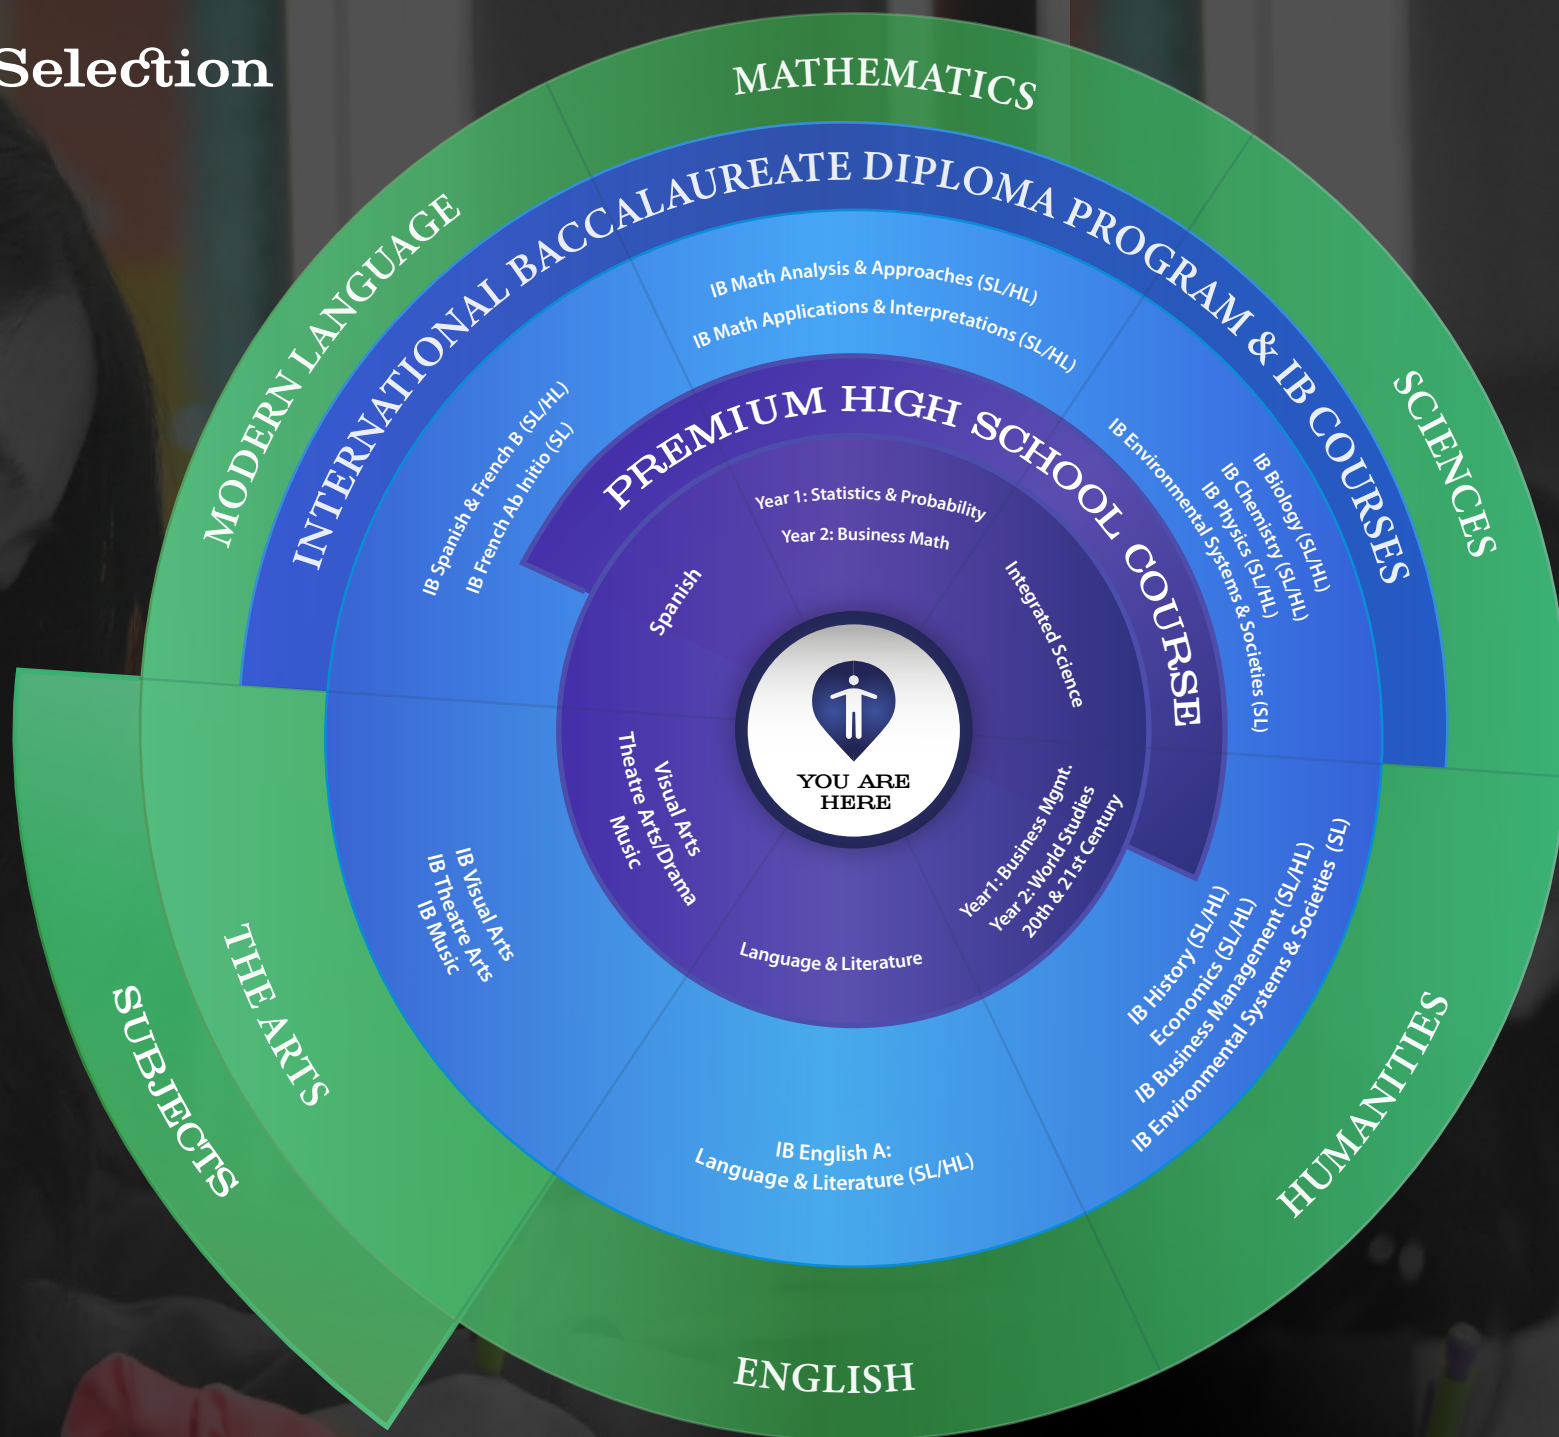

Students can choose to switch at least one or a maximum of six Premium High School Subjects with an IB subject. This flexible option allows students to explore their interests and strengths, earning both a U.S. High School Diploma and certificates in the IB Subjects they select.

International Baccalaureate Diploma Program (IBDP)

The IBDP offers a holistic pre-university challenge. Students study six subjects at the Standard or Higher Level, including Mathematics, Science, Humanities, The Visual and Performing Arts, Modern Language, and English. They also undertake an Extended Essay, explore the Theory of Knowledge, and engage in Community, Action, and Service (CAS). Completing the IB Diploma Program results in earning the prestigious IB Diploma alongside a U.S. High School Diploma.

Subject Selection

AISK's Dynamic Learning Paradigm

AISK employs a holistic approach to teaching soft skills, preparing students for current careers and future job opportunities that may not even exist. Here's how AISK fosters the development of these essential skills:

Incorporating Core Values and IB Learner Profile:

AISK's Core Values, including excellence, reflective thinking, a balanced approach, open-mindedness, and risk-taking, are integrated into the school's culture. These values serve as guiding principles for students' behavior and actions, promoting the development of essential soft skills.

The IB Learner Profile, emphasizing attributes like inquirer, communicator, open-minded, caring, and reflective, provides a framework for nurturing these skills throughout the curriculum.

Approaches to Learning (ATLs):

AISK aligns its teaching methods with the IB's Approaches to Learning (ATLs), designed to cultivate skills beyond specific subjects. These encompass critical thinking, research, synthesis, analysis, knowledge application, and, most importantly, self-reflection.

Dedicated Soft Skills Curriculum:

AISK incorporates soft skills development directly into the curriculum. Lessons and activities encourage effective communication, teamwork, collaboration, organization, self-management, reflection, self-awareness, flexibility, and adaptability. These attributes are essential, particularly as our world's needs change and new job opportunities emerge.

Project-Based Learning

Project-based learning is a cornerstone of AISK's approach. Students engage in hands-on projects that require collaboration, creative thinking, and problem-solving. These projects often have real-world relevance, enhancing the application of skills.

Collaborative Learning Environments

AISK fosters a collaborative learning environment where students collaborate on projects, share ideas, and engage in peer-to-peer learning. This approach enhances teamwork and communication skills.

Extracurricular Activities and Clubs

AISK offers various extracurricular activities and clubs that allow students to explore their interests and develop soft skills outside the classroom. Activities such as debate, drama, and Model United Nations promote communication, critical thinking, and open-mindedness.

Community Engagement

AISK encourages community engagement and service-learning projects. These experiences help students develop empathy, a sense of responsibility, and an understanding of diverse perspectives.

Teacher Training and Professional Development

AISK invests in ongoing teacher training and professional development to ensure that educators can effectively teach and nurture soft skills. Teachers use inquiry-based methods, differentiation, and assessment-informed teaching to enhance student learning.

Digital Literacy Integration

In a digital age, AISK integrates digital literacy across subjects, teaching students to use technology responsibly and effectively. Digital Integration includes information and media literacy skills.

Global Perspectives

AISK emphasizes global awareness and international mindedness. Students are exposed to diverse cultures, languages, and perspectives, promoting open-mindedness and empathy.

Mentorship and Guidance

AISK provides mentorship and guidance programs to support students' personal growth and development. These programs help students set goals, reflect on their progress, and build resilience.

In summary, AISK employs a comprehensive approach to teaching soft skills by integrating them into the school's culture, curriculum, and teaching methods. AISK recognizes the importance of these skills in preparing students for the future job market and strives to create an environment that fosters their development at every level of education.
