Saint Xavier HIGH SCHOOL

Science Department Renovation Project

Our Vision

We aspire to create a transformed Science Department featuring state-of-the-art laboratories, modern teaching spaces, and improved facilities that empower our faculty to teach using the latest technologies and instructional methods within a safe, dynamic learning environment.

Impact

Our facilities must reflect our commitment to preparing students for advanced learning opportunities and careers in science, technology, engineering, and math (STEM). This renovation will provide students access to modern, regulation-compliant equipment and purposely designed lab environments that promote hands-on experimentation, intellectual curiosity, and safety.

The Opportunity

The total cost of the project is $2,100,000.

Location	Cost	Status
First Floor *Physics, Biology Labs, adjoining teaching spaces, and storage/preparation areas*	$1,000,000	Funded
Second Floor *Chemistry labs, adjoining teaching spaces, and storage/preparation areas*	$1,000,000	One available
Series of Biology Labs	$500,000	One available
Biology Lab	$250,000	Two available
Science Fellow	$50,000	Ten available
Science Lab Partner	$25,000	Twenty available
