

2024-2025

The **MACLAY** Fund

Impact Report

As we reflect on the year at Maclay, we are filled with gratitude for the unwavering support of our generous community. Your continued commitment to the Maclay Fund has played a vital role in advancing the school's mission and enriching the student and faculty experience. Because of you, we were able to make a lasting impact across every corner of our 100-acre campus.

THE 2024-2025 MACLAY FUND SUPPORTED MANY MEANINGFUL INITIATIVES, AND WE ARE TRULY GRATEFUL FOR YOUR PARTNERSHIP.

New Transportation for Off-Campus Events and Experiences

The Maclay Fund supported the purchase of new transportation, allowing faculty and students to travel safely and reliably to off-campus events and educational experiences. This investment expanded opportunities for real-world learning, community engagement, and participation in engaging academic and athletics programs beyond the classroom.

Upgraded Lighting in Cartee and Langford Hall

Lighting systems in both Cartee and Langford Hall were upgraded, significantly improving visibility and performance and audience experience for a wide range of events. These enhancements benefited performing arts productions, professional development sessions, and one-school curricular events.

Enhancements to the New Performing Arts Pavillion

The Maclay Fund provided support for components of the new performing arts pavilion scheduled to open in August 2025. These enhancements supported the development of a modern, inspiring space that will serve as a creative hub for students participating in performing arts programs, school events, lectures, and other gatherings.

Robotics Equipment for Middle and Upper School Students

New robotics equipment was purchased for Middle and Upper School students, enriching both classroom learning and competitive opportunities. This technology fostered collaboration, problem-solving, and innovation as students explored advanced STEM concepts and represented Maclay at competitions across the state.

Upper School Experiential Learning Trips

Upper School students will participate in experiential learning trips to historic World War II sites in Europe and New Orleans. These trips will provide immersive lessons in history, culture, and global citizenship, deepening students' understanding of the past and the ongoing relevance to modern events.

Investing in Our Faculty Through the Faculty Salary Growth & Supplementation Endowment

The Maclay Fund continued to support the *Faculty Salary Growth & Supplementation Endowment*, which seeks to transform the way the school's remarkable faculty is compensated and supports Maclay as we recruit and retain the best possible teaching faculty.

Thank You!
