In addition, Pennsylvania requires a physical examination and a dental examination for all new students. Parents have the option of having that exam performed by their own physician/dentist or by the school physician/dentist. Private examination forms are due by the first week of October. Also, additional vision, hearing and growth screenings will be completed during the school year by the school nurse.

- **The following forms should be filled out by your physician/dentist and returned to the school nurse if you choose to have the exams performed privately.**

Home Language Survey

The Office of Civil Rights (OCR) requires that school districts/charter schools/full day AVTS identify Limited English Proficient (LEP) students in order to provide appropriate language instructional programs for them. Pennsylvania has selected the Home Language Survey as the method for the identification.

1. What is/was the student's first language?			
2. Does the student speak a language other than English? (Does not include languages learned in school) If yes, specify the language:			
3. What language(s) is/are spoken in your home?

A. Releasing Authority for Treatment

I request the school to contact me in case of emergency, illness or accident requiring emergency care. If the school is unable to reach me, I hereby authorize the school to call the physician indicated and follow his/her instructions. If it is impossible to contact this physician, the authorized person may make whatever arrangement and transfer pertinent medical records that are deemed necessary. I understand that this emergency care authority may be exercised either locally or when a student is away on a trip.

B. Medication Policy:

It is the policy of the Wallenpaupack Area School District not to distribute medication of any kind without the written permission of the physician or parent/guardian. This includes non-prescription and prescription medicines. The students are not allowed to have medicine of any type in their possession. Wallenpaupack Area School District utilizes the health management system Caretox to maintain and log medication information for each student.

C. I understand that Commonwealth law requires the following:

Physical Examination at time of original entry and in Grades 6 and 11	4 doses of tetanus, diphtheria, and acellular pertussis (1 dose on or after the 4 th birthday)
Dental examination at time of original entry and in Grades 3 and 7	4 doses of polio (4 th dose on or after 4 th birthday and at least 6 months after previous dose given)
Screening for vision at time of original entry and then yearly	2 doses of measles, mumps, rubella
Screening for hearing at time of original entry and in Grades K, 3, 7, and 11	3 doses of hepatitis B
Screening for growth at time of original entry and then yearly	2 doses of varicella (chicken pox) or evidence of immunity
Screening for Scoliosis in Grades 6 and 7	For attendance in 7 th grade: 1 dose of tetanus, diphtheria, acellular pertussis on the first day of 7 th grade For attendance in 7 th grade: 1 dose of meningococcal conjugate vaccine (MCV) on the first day of 7 th grade For attendance in 12 th grade: a dose of MCV on the first day of 12 th grade. If one dose was given at 16 years of age or older, that shall count as the twelfth-grade dose

If physical and dental examinations are done privately, reports/forms are to be returned to the school nurse by the first week of October or these examinations will be done in school. If done in school, parent/guardian will be informed of any abnormal results.

D. Releasing Medical Information

I understand student medical information will only be disclosed by the nurse's office to school staff to the extent necessary to ensure the safety of a student. Medical information shall also be released to medical personnel, but only when necessary to aid in providing emergency treatment. Wallenpaupack Area School District utilizes Caretox to store, maintain, and update medical information.

Type 1 Diabetes Information

This type 1 diabetes information was developed pursuant to the Pennsylvania School Code (24 P.S. § 1414.12) and is for school entities and nonpublic schools to provide to parents and guardians of incoming elementary school students and students entering grade six, beginning with the 2025-2026 School Year.

Type 1 diabetes in children is an autoimmune disease that can be fatal if untreated, and the guidance provided in this information sheet is intended to raise awareness about this disease.

Description

Type 1 diabetes usually develops in children and young adults but can occur at any age

- Type 1 diabetes can appear at any age, but it generally appears at two noticeable peaks. The first peak occurs in children between 4 and 7 years old. The second is in children between 10 and 14 years old ([Mayo Clinic](#)).

Type 1 diabetes affects insulin production

- Normally the body turns the carbohydrates in food into glucose (blood sugar), the basic fuel for the body's cells.
- The pancreas makes insulin, a hormone that moves glucose from the blood into the cells.
- In type 1 diabetes, the body's pancreas stops making insulin, and blood glucose levels rise.
- Over time, glucose can reach dangerously high levels in the blood, which is called hyperglycemia.
- Untreated hyperglycemia can result in diabetic ketoacidosis (DKA), which is a life-threatening complication of diabetes.

Risk Factors Associated with Type 1 Diabetes

It is recommended that children displaying warning signs and symptoms associated with type 1 diabetes described below, should be screened (tested) for the disease by their health care provider.

Risk Factors

Researchers do not completely understand why some people develop type 1 diabetes and others do not. However, having a family history of type 1 diabetes can increase the likelihood of developing type 1 diabetes. Other factors might play a role in developing type 1 diabetes, including environmental triggers such as viruses. Type 1 diabetes is not caused by diet or lifestyle choices.

Warning Signs and Symptoms Associated with Type 1 Diabetes and Diabetic Ketoacidosis

Warning signs and symptoms of type 1 diabetes in children develop quickly, in a few weeks or months, and can be severe. If your child displays the warning signs below, contact your child's

primary health care provider or pediatrician for a consultation to determine if screening your child for type 1 diabetes is appropriate:

- Increased thirst
- Increased urination, including bed-wetting after toilet training
- Increased hunger, even after eating
- Unexplained weight loss
- Feeling very tired
- Blurred vision
- Very dry skin
- Slow healing of sores or cuts
- Moodiness, restlessness, irritability, or behavior changes

DKA is a complication of untreated type 1 diabetes. DKA is a medical emergency. Symptoms include:

- Fruity breath
- Dry/flushed skin
- Nausea
- Vomiting
- Stomach pains
- Trouble breathing
- Confusion

Type 1 Diabetes Treatments

There are no known ways to prevent type 1 diabetes. Once type 1 diabetes develops, medication is the only treatment. If your child is diagnosed with type 1 diabetes, their health care provider will be able to help develop a treatment plan. Your child's health care provider may refer your child to an endocrinologist, a doctor specializing in the endocrine system and its disorders, such as diabetes.

Contact your child's school nurse, school administrator, or health care provider if you have questions.
