rick	interesting that the city does more identification of litigation topics and Ms. Perry seems to desire to emulate the city except in this category.	<p>Well as the majority members of the board have their first meeting with Dr. Glass it would seem appropriate (based on the complimentary comments made by Dr. Glass in his interview with Andrew Turner) that Perry, Hills and Morgan publicly apologize for discrediting the districts achievements and success in recent years and especially as Hills and Morgan campaigned. You two won your seats by stating vehemently that the district was failing it students. Misleading the public at large and casting a negative light on all the staff does for the students. Course correction is needed.</p> <p>Governance section dealing with SRO. Regarding student request remember not only are there few female officers but SRO duty is not suited to every officer. And LBUSD has numerous female counselors, social workers, nurses, etc who have training in working with youth. Important to ask for data regarding this student's claim of date rape and aligned issues. That would be the bigger issue if it needs more attention. She made it sound widespread.</p>	It appears there was a necessity for LABUFA to use a percent to address longevity. Assume that means there is 3% across the board for all employees and LABUFA has staff support for those with fewer years receiving less of an increase in the coming year.	District does meet the needs. Pay attention majority that the district is doing right by students.	Extremely important to keep this project moving forward. Nice if someone noted publicly that the district made significant changes to address CEQA concerns which deal with height, sound and light (neighborhood issues). Can't really recall the city needing to mitigate like this as their statements seem to state no CEQA concerns.
anonymous		Very gratifying to read the positive comments from Dr. Glass in the Daily Pilot 7/18/25. His support of the district whole child approach which has been ongoing for years. Acknowledging the technology work that has been done utilizing it for student benefit while keeping them safe. Recognizing the arts and environment and how the district has brought those from the community in to enhance the student learning experience and he intends to continue on that path. Sincerely hope he educates Perry, Hills and Morgan so they cease being negative about the district and stop publicly putting the district programs and staff down as being insufficient. It seems Dr. Glass is willing to be the leader if the majority will back off from the comments that the board should run the district and Superintendent is there to do as they dictate.			Nice changes to benefit the surrounding neighborhood

<p>Action: Approval of the 2027-28 Student Instructional Calendar</p>	<p>Action: Approval of Service Agreement with Leadership Associates to Conduct an Executive Search for the Position of Assistant Superintendent, Business Services in an Amount of \$15,000</p>	<p>Action: Approval of Consent Calendar Items C-UU</p>
<p>Hope the majority does not fall back on the redundant conversations about ruining summer as they knew it. Schools start earlier almost across the board. LBUSD girls' volleyball first match August 2nd and first Football game August 21st.</p>	<p>Sign of the times as Superintendents favor using a consultant. Might be a first for LBUSD. As to this position---keenly important and the board needs to be able to trust this person. Assume Dr. Glass with the search firm makes a qualified choice then board majority will need to learn to trust on their part.</p>	<p>Consent is packed. Remember Perry and Hills that consent items are to be items anticipated by those who do the agenda planning and review to not need discussion. If a number of these consent items are pulled tonight, then give more thought to how you can do a better job of identifying items that should be on as action. Majority three have long criticized previous boards for "hiding" items in consent to avoid public scrutiny. Rule of thumb is large financial impact items go on as action to publicly call attention to them. That is transparency at work. This agenda that would apply to BB, CC, and GG.</p>
