

Access Your Child's Individual QR Code

To access your child's individual QR code to help them log into their student account on a separate device, you will need to log into your parent account on the app. You are unable to access the individual QR code from the web at this time. Learn how to access the QR code from your iOS device or Android device below.

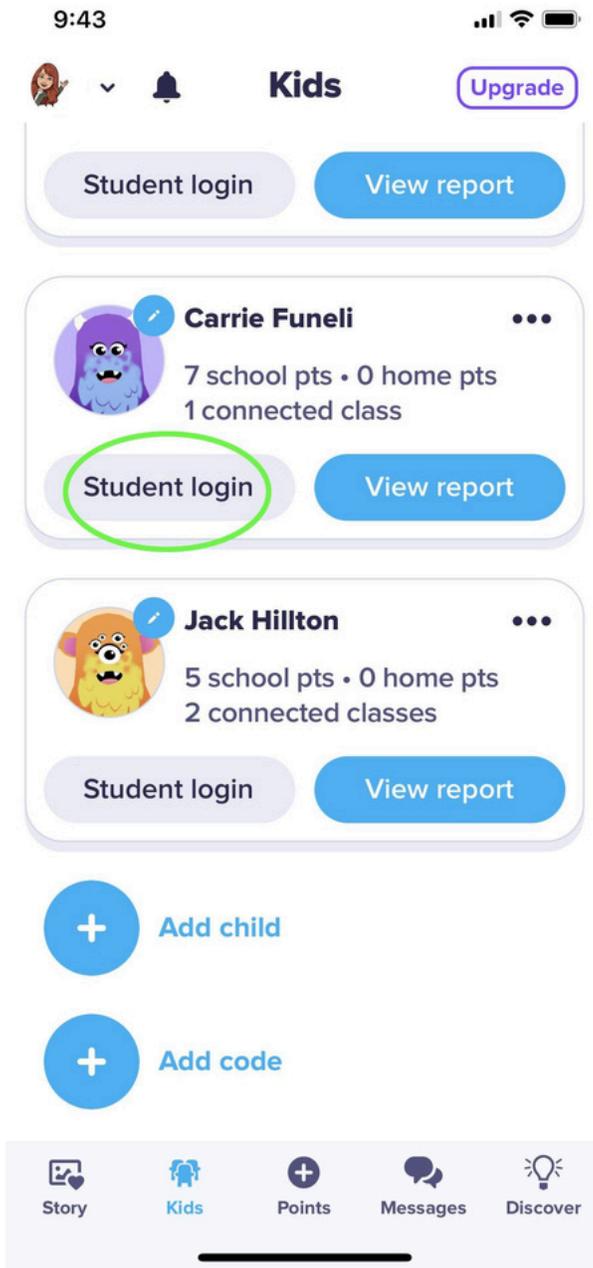

Once you access the code, you can log your child into their student account on a different device. 🎉 If you need additional instructions, please see [this tutorial](#).

iOS

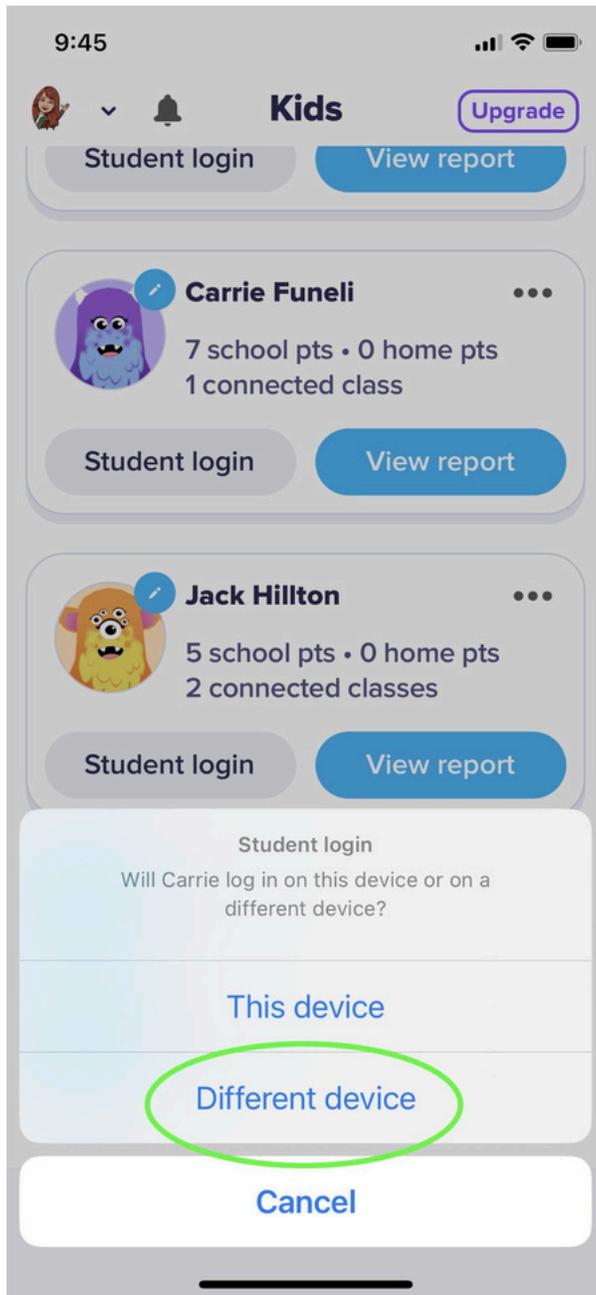

You can access an Individual QR code for your child from your parent account on the iOS app. To do this:

- Log into your parent account
- Tap on the "Kids" tab at the bottom of your screen

● Tap on "Student login" under the child you would like to pull the QR code for

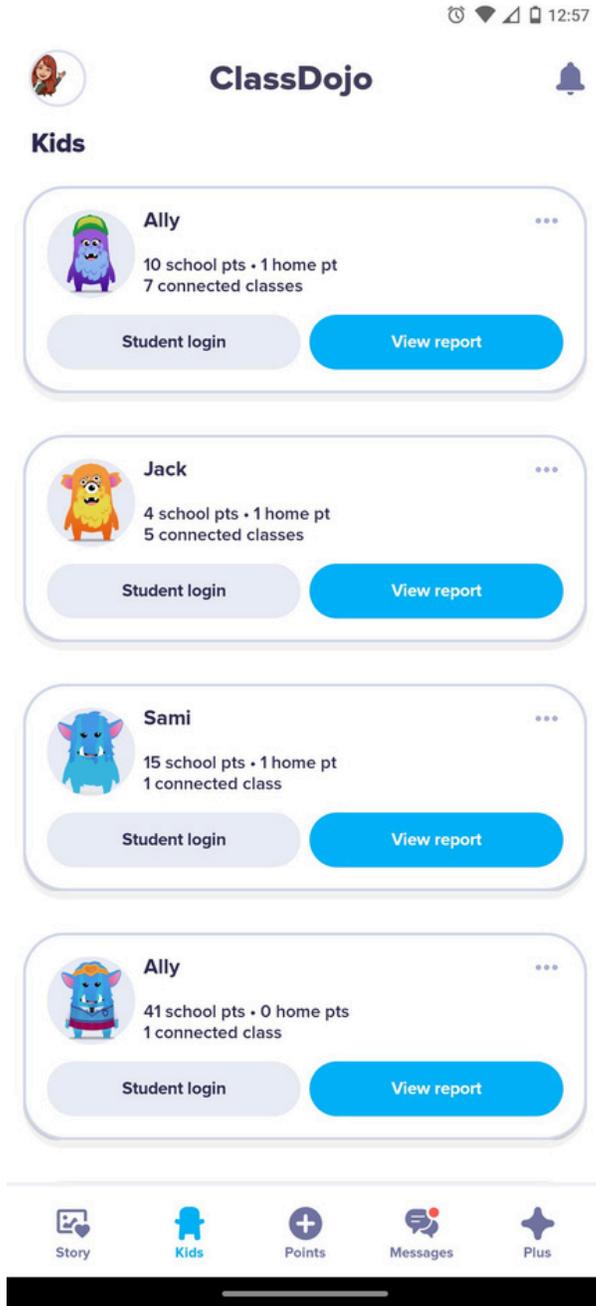

- Tap "Different device" in the pop-up window, and the QR code will appear

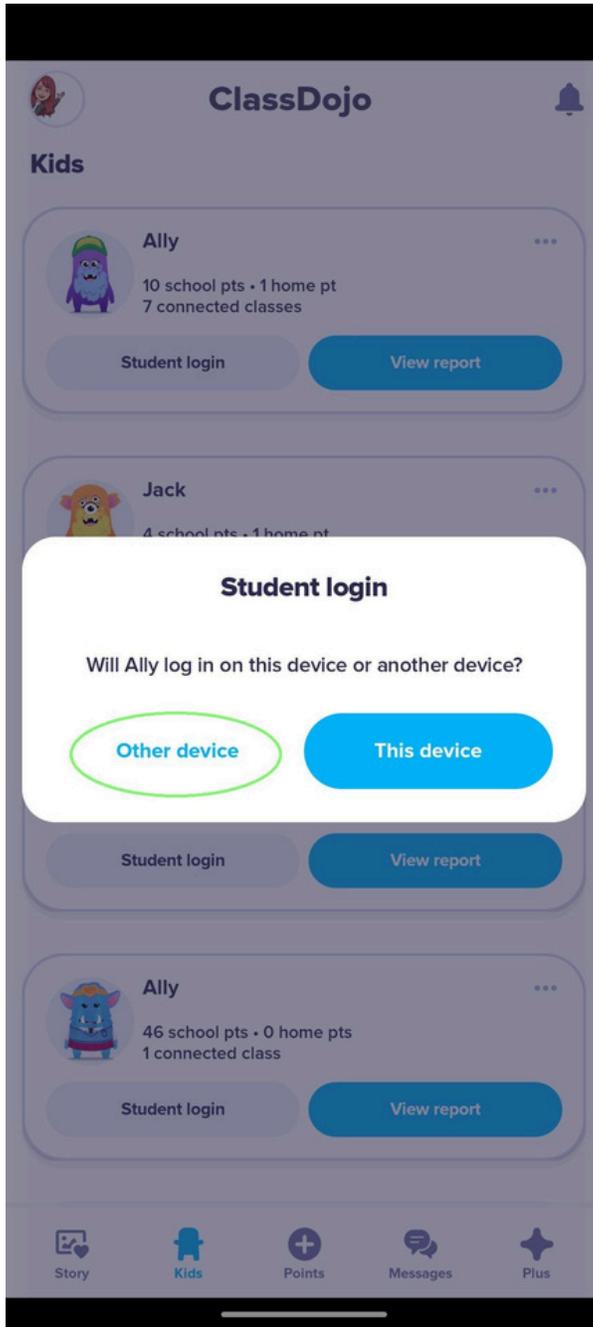

Android

You can access an Individual QR code for your child from your parent account on the Android app. To do this:

- Log into your parent account
- Tap on the "Kids" tab at the bottom of your screen
- Tap on "Student login" under the child's monster that you would like to pull the QR code for

- Select "Other Device"

- Using another device, download ClassDojo and scan the code in the app

BE SURE TO Enable NOTIFICATIONS

iOS

Open Settings: Locate and open the Settings app on your iPhone.

Go to Notifications: Scroll down and tap on "Notifications".

Select the App: Find the specific app you want to manage notifications for and tap on it.

Enable Notifications: Ensure the "Allow Notifications" toggle is switched on.

Android

Open your device's Settings app.

Tap Notifications. App notifications.

Under "Most recent," find apps that recently sent you notifications. To find more apps, in the dropdown menu, tap All apps.

Tap the app.

Turn the app's notifications on or off.
