

## **FACILITY IMPROVEMENT OR DEVELOPMENT INVOLVING BOND MEASURE PROPOSAL**

Recognizing the long-term community commitment when the district issues new bonds for property improvement, development or acquisition, the superintendent shall not fail to:

1. inform the board when the district is constituting a facilities and bond planning process;
2. seek appropriate stakeholder input in the planning process;
3. use best practices in evaluating the adequacy of existing facilities and in the design of new facilities;
4. assure that final recommendations regarding facilities and bonds are aligned with district's strategic plan, The Bellingham Promise; and
5. provide opportunity for board and community discussion prior to final board action.

Note: If no bond planning process occurs during a given reporting period, no monitoring report is required.
