

SAFE DE

The State of Delaware's Comprehensive School Safety Program (CSSP) is happy to introduce a fully funded Safety and Wellness suite to support Delaware Schools.

The suite entails, standardized, effective, evidenced based tools for schools to be able to provide an array of consistent assistance, support, and preventative measures to our students.

Our Suite is a multi-pronged approach, and includes **SAFE DE** (from The Stopit Solutions Company), which is our anonymous reporting app that also contains, crisis texting, basic resource information, mental health education and exercises.

The Suite also includes a Behavioral Threat (BTA); Comprehensive School Threat Assessment Guideline (CSTAG) and Suicide Risk Assessment (SRA) model (Columbia), as well as a guided case management system to support students', staff, and parents of Delaware.

Please respond promptly to learn more about this initially fully funded suite, and bring these customizable, lifesaving programs to your school.

What's Included:

SAFE DE: Support and Resources for Students, Staff, and Families. Delivered on our state-of-the-art platform, SAFE DE provides the connection to support and resources—unique to communities—delivered clearly and consistently to all schools and families. The healing-centered, intuitive interface builds agency by providing choice while maintaining privacy.

24/7/365 HELP Center: Our in-house HELP Center specialists complete comprehensive training to prepare them to monitor and manage both life and non-life-threatening incidents. Our team immediately escalates life threatening concerns and incidents to local law enforcement.

Crisis Text Line (CTL): Integrated into the SAFE DE platform and available anywhere in the United States, anytime. A live, trained Crisis Counselor receives the text and responds, all from our secure online platform. The Crisis Counselor is trained to help individuals move from a hot to a cool place.

Out of Hours Incident Management (OOH): Out-Of-Hours service allows individuals to rest easy knowing all incidents are reviewed, vetted, and acted upon (if necessary) by certified specialists during weekends, holidays, and other traditional out-of-school hours.

Behavioral Threat & Suicide Risk Assessments are evidence based processes by which schools are trained to take appropriate protective action before a conflict or problem escalates into violence. The focus is identifying and helping students in need of assistance. It also provides for consistent processes and procedures for managing and handling threats and students in distress. A well-developed process and well-trained team removes subjectivity around handling matters of concern and ensures consistent evaluation of all threats and students in need.

Case Management System: Houses pertinent, applicable information throughout the students' entire K-12 tenure with Delaware's schools to aid in providing assistance to students in need and in deterring violence.

This multi-pronged approach is a testament to our commitment to collaborative and proactive school safety. By combining the real-time responsiveness of the **SAFE DE** App with evidence based models and robust case management capabilities of Public Consulting Group (PCG), we create a powerful system that not only identifies concerns but also initiates a well-coordinated and effective response.

How SAFE DE Works for Students:

Connect to Basic Needs Resources:

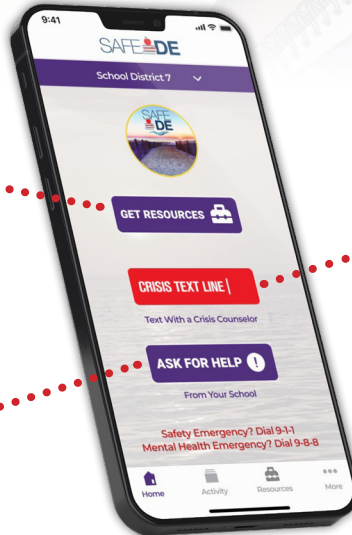

Self Help: Get Resources

We understand that basic needs are fundamental to mental health and wellbeing.

Two-Way Communication with School

Ask for Help: Get Help from Your School or Community

We encourage student connectedness and a culture of helping others.

Immediate 24/7 Crisis Support

Help from a Trained Crisis Counselor at Crisis Text Line

We know that suicides are more likely to occur after midnight, making round the clock coverage mandatory.

How SAFE DE Works for Admins:

1

Step 1: Student Submits a Request for Help

A student can request assistance, or anonymously ask for help using the SAFE DE Mobile App, Chromebook, or Phone

2

Step 2: HELP Center Monitors, and Escalates the Incident (as needed)

SAFE DE's 24/7/365 HELP Center monitors and escalates life threatening incidents to school admins and law enforcement (as needed).

3

Step 3: School Admins Receive and Act Upon the Incident

School admins receive and act upon the incident using the admin app and/or web-based Incident Management System, and manage the incident through resolution.

STOPit Solutions through the **SAFE DE** App, provides the industry's most comprehensive onboarding for program administrators AND training for students and adults on how to recognize safety, misconduct, and/or mental health and personal concerns. **SAFE DE** is one of the three components of the Safety and Wellness Suite being offered.

Onboarding and Implementation of the Safety and Wellness Suite:

Adoption

Month 0

SAFE DE Onboarding

Month 0-2

SAFE DE Launch

Month 1 - 3

CSTAG/BTA & SRA Training

Month 3

BTA & SRA Case Mgmt Training & Onboarding

Month 4 - 5

BTA & SRA Launch
