- **Volunteer State Community College** – Entertainment Media Production

Career Outlook

As the need for businesses to help enhance communication and collaboration among employees, customers, and clients rises, there is an increasing need for skilled professionals who can improve productivity, reduce costs, increase collaboration, and enhance presentations and performances. According to the Bureau of Labor Statistics, overall employment of broadcast, sound, and video technicians is strong both statewide and nationally. Nationally, broadcast, sound, and video technicians are projected to grow two percent from 2022 to 2032, about as fast as the average for all occupations. Tennessee is expecting a 38 percent projected growth in the employment of audio-video technicians. There are about 12,900 openings for broadcast, sound, and video technicians projected each year, on average, over the decade. Many of these openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as retiring.
