|              |                                                                  | Deck Description: I plan to build an elevated outdoor deck over a section of my backyard. The deck will have a wooden frame foundation constructed using pressure-treated lumber, supported above ground with appropriate footings. The surface will be finished with WPC (Wood-Plastic Composite) deck boards, which will be securely fastened to the wooden joists. The deck is intended for personal residential use (not enclosed or roofed) and will be attached to the main structure of the house. It may include a railing depending on the height. Purpose: To provide a safe, durable, and low-maintenance outdoor living area for long-term enjoyment. |                 |            |                  |                                          |                  | Applicant      | Ralph Minaya, Address:1771 ASYLUM AVE                                                                |

Found with Eversource power into building to be correct. Work with Switchgear company to resolve issue with Main breaker. After Eversource shut all power off, open main switch to find that the main breaker had tripped halfway for a ground- fault and had gotten stuck halfway. The ground fault is believed to have taken place months ago. The " C" Phase tab on the main switch burnt because of it getting stuck halfway. Lube and clean main switch. Get system working correctly. Test GFI of main to watch it trip correctly. Restore power to building and check systems at start up. Main Switch- will need to be replaced this was a temp Repair |                 |            |                   |                |                  | Applicant                         | CERRETO ASSOCIATES LLC, Address:Craig C. |              | 19 HUNTER DRIVE, WEST HARTFORD, CT 06107<br>2841 1 19 0001      | This project involves the complete removal and replacement of the existing exterior siding on all elevations of the residence The project includes sheathing inspection, weather barrier replacement, installation of new composite siding, trim, and accessories. Demolition: Full removal of existing siding down to the structural sheathing. Removal of all associated exterior trim, light fixtures, vents, and J-channel. Sheathing Inspection: Visual inspection for rot, insect damage, or structural compromise. Any compromised sheathing or framing will be repaired or replaced in-kind (like-for-like). WRB Installation: Install full weather-resistant barrier (e.g., Tyvek or equivalent) over the sheathing. Flashing tape at all windows, doors, and penetrations. Siding Installation: Install Siding system Starter strips/J-channels/Corner posts/Seam brackets/Trim and Finishing: Remove and replace existing windows throughout the home. All new units will be Energy Star-rated, double- pane insulated glass with low-E coating and argon gas. No changes to existing structural openings. All existing trim and siding around openings to be repaired or replaced as needed to ensure proper weather sealing. |                 |            |                  |                | 07/28/2025       | Contact Type   | Contact Description                                                                |

|              |                                                                | The basement contains an old 20A single receptacle outlet for a washing machine and an old 30A single receptacle outlet for a dryer. The project is to remove both outlets and place a new 2-gang outlet containing GFCI receptacles in the same location as the 30A dryer outlet, connected to the 20A (previously washer) circuit, using the rigid conduit that is already on the wall. The 20A outlet is connected from an old junction box on a joist with about 5 feet of flexible conduit and then 3 feet of rigid conduit down the wall to the outlet. The flexible conduit, rigid conduit, and outlet will be removed. The old junction box will be replaced with a new 4x4 junction box to feed the new 2-gang GFCI outlet. The junction box currently contains 5 conductors: 12/2 coming in and old cloth-covered 2-conductor wire going to the outlet. The new junction box will contain 6 conductors: 12/2 coming in and 12/2 going to the new receptacle. The 30A outlet is connected by 10awg Romex running along a joist leading to about 3 feet of rigid conduit down the wall. The 10awg wire will be removed from the outlet and rigid conduit. A new 4x4 junction box will be placed on the joist above the location of the outlet. The 10awg wire will be terminated safely inside of the new junction box with wire nuts, grounding screw, and faceplate. (We are saving this circuit in this location in case it is needed in the future, perhaps for a future induction cooktop in the kitchen.) A new 20A 2-gang outlet with GFCI receptacles will be attached at the bottom of the rigid conduit (previously the 30A receptacle). 10' of 12/2 Romex will be installed from the new junction box in the 20A circuit to the rigid conduit, and then to 2-gang GFCI outlet. Diagrams and photos are included with this application. |                 |            |                       |                                          |                  | Applicant      | Jon Sprouse, Address:102 FOUR MILE ROAD                                                          |

|              |                                                                  |               |                 |            |                   |                |                  |                | Current house is a 2-story 1,500sqft Colonial with attached garage with a large 16'x32' deck out back. Adding a 18'x16' addition in place of the existing deck. Intent is to add a 256sqft 3-season room on the 1st floor (insulated but unconditioned, retaining existing patio door between room and existing house) and adding 288sqft on the 2nd story to turn master bedroom into a master suite. Includes a shed dormer on the existing front roof to match dormers on the addition. 2nd floor will cantilever 2' east and new footprint will be utilized as the master bedroom and walk-in closet. Existing master bedroom will be converted to a full master bath. Walk-up attic stairs will be added in existing space as well. Deck will be retained but decrease in size from 480sqft to approximately 256sqft. Basement will tie into existing basement via a standard 36" door and have a walkout to the backyard via a single 36" exterior door with steps up to grade. |
