#### 4: Resources and Justification

##### Resources

The Freehold Borough School District identifies district needs on an on-going basis. This needs assessment includes examination of specific professional development and training opportunities for all staff. District administrators work collaboratively with school level administrators and supervisors to properly budget for the relevant needs of staff. The allocation will come from a combination of state and federal funds and will be adjusted if necessary, pending board approval. This amount covers costs for external providers/consultants, materials, technology resources, travel expenses, subscriptions to online resources, and staff stipends.

##### Justification

An in-depth data analysis of state standardized test scores, local benchmarks, school profiles, and performance targets, and regular meetings of PLCs/committees have identified priority areas related to the consistent and successful implementation of the NJSL and AchieveNJ. Emphasis will be placed on data to drive instruction, literacy, targeted student subgroups, and teacher evaluation. In order to provide these beneficial and personalized experiences, collaboration must occur at the building and district level, encompassing specific staff needs, as aligned with curriculum, instruction, assessment, budget, and special programs. The fiscal impact of the professional development program is monitored by administration regularly in order to properly balance addressing the needs of the district in a fiscally responsible manner.
