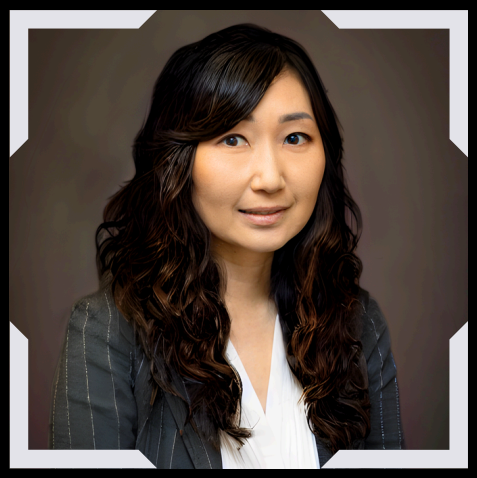
HUTCHINSON MIDDLE SCHOOL STEM MAGNET

hutchinson.nlmusd.org

Welcome to Hutchinson! We are the home of the soaring Hawks! Our mission is to cultivate a positive community of engaged critical thinkers who all have access to high quality instruction in a supportive learning environment. Our STEM Magnet Program is based on three pillars: high quality curriculum, equity and access for all students, and community involvement. Using a combination of research-based curricula, students learn to think critically and creatively, collaborate with peers and mentors from the field, and use STEM-focused problem-solving strategies to address real-world problems. Our students are challenged to excel as well as become successful students and productive citizens in our society.



- Jenny Bae, Principal

Distinguished School
