TECHNOLOGY P.I.E. MEETING
[Problems, Issues, & Events]
January 18, 2023

CrisisGo

Our schools were working with CrisisGo a few years ago, before we switched to virtual learning due to covid. CrisisGo is a program that helps prepare staff that are responsible for others during a crisis. CRPs were informed that we are putting this program back into use immediately and they were asked to inform their building staff. The Network Administrators have been working on setting everyone up in the program. The app is on every staff desktop and can be added to your cell phone to help you stay up to date if there is a crisis in your building. The program is very easy to work with. Chris Orr will offer a couple of training opportunities to CRPs and provide the basic information about the program. If a CRP needs more help training building staff, she can help with that too. Chris will also work with the building techs, the annex building staff, and the Administration buildings. Please contact Molly Bailey or Chris Orr if you have questions about CrisisGo.

Preparation for Professional Development Days

MaryEllen commented that two, half-day Professional Development days, are coming up February 17th & March 17th. MaryEllen is planning to have some breakout sessions during the March 17th Professional Development time. One of the responsibilities of a CRP is to provide professional development, so let her know if you are interested in being a trainer during a session/breakout time. She would also like to know what your building is interested in learning about during these training times, so please email her your recommendations.

Building Concerns / Needs

FastBridge is still experiencing trouble with their servers so we will continue to have issues until their problem is resolved.

Meeting adjourned at 7:15am
The next Virtual Tech P.I.E. meeting will be Wednesday, February 15, 2023
