

Sustainable Agriculture

FOUNDED IN 2015

VinSense specializes in high-resolution soil and crop trait mapping, real-time root-zone monitoring, and precise recommendations for irrigation and nutrient management.

CORE TECHNOLOGIES:

- High-resolution spatial models of soil chemical and physical properties
- Real-time soil moisture and temperature sensor network integration
- Science-backed and AI-driven nutrient and irrigation recommendations
- Grower-friendly digital platform for visualization and site-specific decision making

**SMART SAMPLING · MAPPING &
SITE-SPECIFIC RECOMMENDATIONS
· REAL-TIME SOIL MONITORING ·
DISEASE & PEST MANAGEMENT**
