

Board of Education Policy

EXTREME HEAT CONDITION DAYS

As required by Education Law section 409-n, the Board of Education adopts this policy to address the health and safety of students and employees on extreme heat condition days. “Extreme heat condition days” are defined by law as when occupiable educational and support services spaces are eighty-two degrees Fahrenheit or higher. Under the law, “support services spaces” do not include kitchen areas used in the preparation of food for consumption by students. The law requires room temperature to be measured at a shaded location, three feet above the floor near the center of the room.

Air conditioners, where available, may also be used to keep temperatures from reaching eighty-two degrees, or to lower the temperature once the temperature reaches eighty-two degrees. Evaporative cooling techniques may be feasible in some situations.

Actions to be Taken at Eighty-Two Degrees

When the temperature of an occupiable educational or support service space reaches eighty-two degrees Fahrenheit, the district will take actions to relieve heat-related discomfort (consistent with fire, security and building codes), including but not limited to the following:

1. Turning off the overhead lights;
2. Pulling down shades or blinds;
3. Turning on fans;
4. Turning off unused electronics that produce heat and;
5. Providing water breaks.

The Superintendent of Schools and/or their designee, Director of Facilities, and Building Principals will determine which actions to take, when to take them and in what order, and who will take them (consistent with applicable collective bargaining agreements).

The Superintendent, Director of Facilities and Principals will use various strategies to cool the district’s occupiable educational and support services spaces during hot days. The district should remind students and their families to dress appropriately for the weather.

This policy does not preclude air conditioning from being used pursuant to an Individualized Education Program, Section 504 Plan, or documented medical need.

Students and staff will be removed from educational and support services spaces when the temperature reaches eighty-eight degrees Fahrenheit, when practicable. The Superintendent and/or their designee will direct Building Principals to evacuate the space, including but not limited to the following:

1. Move students and staff to cooler locations; or
2. Close school early and send students and staff home according to the district’s early closing protocols, if practicable.

Board of Education Policy

EXTREME HEAT CONDITION DAYS

On days when the outside temperature is expected to be high enough that temperatures in occupiable educational or support service spaces are likely to reach eighty-eight degrees, the district may hold classes remotely (in accordance with the board-approved emergency remote instruction plan) or close school entirely (in accordance with required minimum instructional time). The Superintendent and/or their designee is authorized to make this decision.
