(0.6 mi) Turn left into the LHS parking lot after the baseball field. Proceed west to loading dock doors #21 and 23.
Please proceed slowly on campus, and observe posted Fire Lane requirements.	

Bus Parking: Located within 100' of the backstage area. There is NO shore power available.

Truck Parking: Located in the loading area – providing fire lanes are maintained. **Overflow parking** is across the street from the theater on Franklin Boulevard.

Load-in*: Ramp off truck, to ground level, ramp into building, onto freight elevator, then onto stage. **Load-in specs:** Door #21 is 9'6" high x 11' wide; Door# 23 is 9'6" high x 9'5" wide. Door #23 has a hydraulic loading platform.

Freight Elevator: 7' high x 9' deep x 11' wide with a 7,000 lb. capacity. Located stage right. Height difference from the load-in elevation onto stage elevation is 4 feet.

House Lights: Lights are controlled from stage left, tech area front-of-house and control booth.

Power: 400 amp; 3 Phase, 4W 120/208V-located upstage left
300 amp; 1 Phase, 3W 120/240V-located upstage left

Dressing Rooms: Our two dressing rooms with restrooms are accessible from stage right and left. Showers are available in the Physical Education wing, rooms E174 and E175. Passenger elevator available from stage level to Green Room area.

Production Office: Downstairs area under stage, has Green Room and two phone lines. Additional area is next to Catering Room with three phone lines. Internet hard-wire lines are available in either area, upon advance request.

Internet Connection: Wi-Fi available upon request.

Follow Spots: 2 HM1 500. Clear-com in house.

Barricade Orchestra: Pit is normally seated.

Sound Level Limits: None. Note: No sound check is permitted until after 3 PM when school is in session.

Stagehands: Non-union

House Fire Curtain: Please note – Nothing may obstruct the fire curtain (7 feet from the downstage edge). Monitors or mike stands may be placed upstage or downstage of the curtain, but *nothing* may block the curtain.

Front of House: 45 feet from the downstage edge position

Snake Runs: Must go beneath seating area requiring 75' from front-of-stage to front-of-house.

Stage Typical Proscenium: permanent fixed structure 60' wide x 38' deep x 4' high. Curtain opens to 55'

Apron Depth: 5'7"

Stage Left Wing: 19'4"

Stage Right Wing: 9'8"

Proscenium Opening: 24' high

Soft Goods: Main curtain and valance are dead hung; Four travelers with borders are counterweighted; white cyclorama is counterweighted.

Rigging

Fly lighting and stack sound are permitted

- Seven scenery battens, counterweighted
- Five house electric battens, counterweighted
- Two points over the pit, approximately 8' downstage.

The beams are spaced as follows:

- Three beams stage left that are 7', 19' and 31' off center.
- Three beams stage right that are 6', 19' and 31' off center.

The thimble from the rigging steel will not fit over the beam, thus the need for two-ton beam clamps. *House does not supply*. There is no place to hang audio without obstructing the fire curtain.

Other

*Please note: Due to the fact that the theater is located on a school campus, load-in must accommodate the movement of students through the hallways between 8 am - 3:15pm. This means that every 40 minutes, load-in (i.e. moving cases through the hallways) must stop for a span of six minutes while students change classes. This DOES NOT affect any work in the theater, however. A Lakewood Police Department uniformed officer must be onsite if load-in occurs during the school day.

FREQUENTLY ASKED QUESTIONS

*Lakewood Civic Auditorium is an 1,800-seat proscenium space,
well-equipped to handle most special event needs.*

1. Opening width 60' (main curtain opens to 55')
