Pittsford Schools

Kindergarten Guiding Principles

We believe all children are capable learners and are unique in their personal development.

Therefore, our kindergarten program will…

provide learning experiences across all curricular areas that are developmentally appropriate…

approach learning through the inclusion of teacher directed and child directed play…

engage students in creative, authentic, standards-based, learning experiences…

establish a collaborative partnership between parents and the school community…

foster secure and supportive adult and peer relationships…

cultivate a nurturing, and inclusive classroom environment…

…to ensure the growth and development of the whole child.
