Grade 1 Contents . . . . .	<b>8–17</b>
Grade 1 Pacing Guide . . . . .	<b>17</b>
Rigor . . . . .	<b>18–19</b>
TEKS and the State Test . . . . .	<b>20–21</b>
ELPS . . . . .	<b>22</b>

Key

- Number and Operations
- Algebraic Reasoning
- Geometry and Measurement
- Data Analysis
- Personal Financial Literacy

Mathematical Process Standards  
 are found in all lessons.

Texas Focal Points

- TFP 1** Developing an understanding of place value  
TOPICS 1, 3, 7, 8, 9, 10, 11, 15
- TFP 2** Solving problems involving addition and subtraction  
TOPICS 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11
- TFP 3** Analyzing attributes of two-dimensional shapes and three-dimensional solids  
TOPICS 12, 13
- TFP 4** Developing the understanding of length  
TOPIC 14
- GLC** Grade Level Connections  
TOPICS 13, 14
- FL** Financial Literacy  
TOPIC 16

**Step Up to Grade 2**

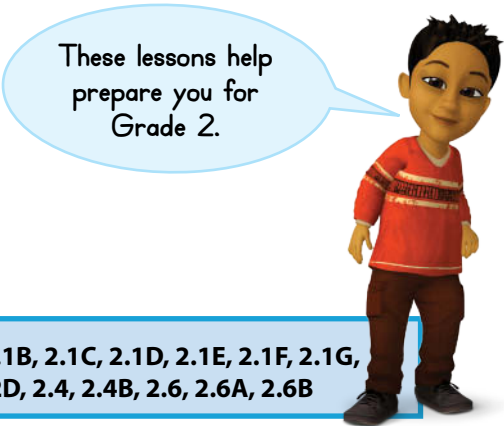

Table of Contents .....	855
Grade 2 TEKS for Step-Up Lessons .....	856
1 Counting Hundreds, Tens, and Ones .....	857A
2 Counting Thousands, Hundreds, Tens, and Ones .....	861A
3 Comparing Numbers .....	865A
4 Ordering Numbers .....	869A
5 Adding Tens .....	873A
6 Adding on a Hundred Chart .....	877A
7 Subtracting Tens .....	881A
8 Subtracting on a Hundred Chart .....	885A
9 Repeated Addition and Multiplication .....	889A
10 Division as Repeated Subtraction .....	893A

**A Program Paced for Success**

The pacing below assumes 1 lesson per day. Additional time may be spent on review, remediation, differentiation, and assessment as needed.

**VOLUME 1A**

- 9 DAYS **TOPIC 1** Understanding Addition
- 9 DAYS **TOPIC 2** Understanding Subtraction
- 5 DAYS **TOPIC 3** Five and Ten Relationships
- 9 DAYS **TOPIC 4** Addition and Subtraction Facts to 12

**VOLUME 2A**

- 11 DAYS **TOPIC 5** Addition and Subtraction Facts to 20
- 5 DAYS **TOPIC 6** More Addition and Subtraction
- 5 DAYS **TOPIC 7** Counting and Patterns to 100
- 7 DAYS **TOPIC 8** Tens and Ones

**VOLUME 2A**

- 5 DAYS **TOPIC 9** Numbers to 120
- 9 DAYS **TOPIC 10** Comparing and Ordering Numbers to 120
- 5 DAYS **TOPIC 11** Money
- 8 DAYS **TOPIC 12** Geometry

**VOLUME 2B**

- 5 DAYS **TOPIC 13** Fractions of Shapes
- 7 DAYS **TOPIC 14** Measurement
- 6 DAYS **TOPIC 15** Data
- 5 DAYS **TOPIC 16** Personal Financial Literacy

110 DAYS

10 DAYS Step Up to Grade 2

**Rigor means ...**  
developing skills and concepts  
with depth of understanding.

### Essential Understandings

**For each lesson**, the Teacher's Edition states a content-specific essential understanding to make explicit during instruction.

**Do You Understand** question in the lesson connects to the essential understanding.

### Big Ideas in Mathematics

**Big ideas link smaller ideas** (essential understandings) into a coherent whole within and across grades and strands.

**Math Background** at the start of a topic connects essential understandings to big ideas. Look for ways to make big ideas explicit.

### Texas Focal Points

**Content to emphasize** at each grade is identified in the Texas Response to Curriculum Focal Points Revised 2013. *enVisionMATH Texas 2.0* content reflects this emphasis.

### Grade 1 Texas Focal Points

- Developing an understanding of place value
- Solving problems involving addition and subtraction
- Analyzing attributes of two-dimensional shapes and three-dimensional solids
- Developing the understanding of length

**Rigor means ...**  
cognitively demanding tasks;  
a rich problem-solving model.

### Multi-Step Problems

**Provided throughout** the program. Some problem-solving lessons in Grades 1–5 focus on how to solve multi-step problems.

### Problem-Solving Model

**Used in examples** in problem-solving lessons.

**Used in exercises** including some Grades 3–5 exercises labeled Analyze Information, Formulate a Plan, and Check for Reasonableness.

### Strip Diagrams

**Taught before Topic 1** in the Grades 3–5 Problem-Solving Handbook.

**Taught and used** in lessons, starting with part-part-whole mats in Grades K–2.

**Used in a digital math tool** for creating strip diagrams.

From Grade 2

### Mixed Problem Solving

**An end-of-topic page** in Grades 1–5 provides the kind of rich, rigorous, mixed problem-solving experiences found on the state test.

**Rigor means ...**  
using algorithms flexibly,  
accurately, and efficiently.

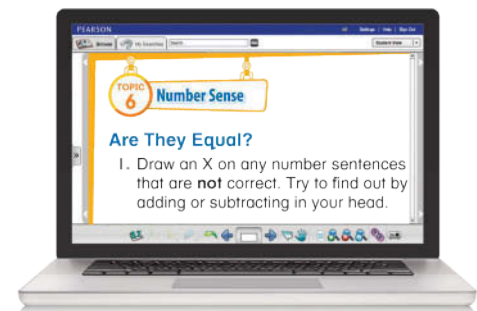

### Standard Algorithms

**Taught for understanding** using visual models and step-by-step examples.

**Practiced for fluency**, often with leveled practice in Grades 3–5.

### Number Sense

**A number-sense focus** is provided in whole topics, whole lessons, and, at Grades 1–5, a special feature at the end of each topic.

**Number-sense questions** are labeled in exercises at Grades 3–5 and in the Teacher's Edition.

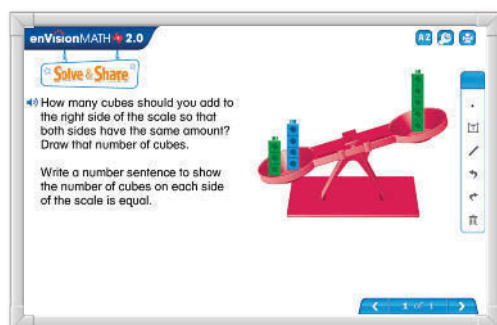

**Rigor means ...**  
a high cognitive level of core instruction.

### Problem-Based Learning

**Drives the core instructional model** with problem-based learning at the start of each lesson.

**Research shows** that introducing new ideas by having students solve problems in which those ideas are embedded develops deeper understanding than other methods.

**Look for opportunities** to make important math explicit during problem-based learning.

### Visual Learning

**Increases the cognitive level** of instruction by connecting concrete and pictorial representations to abstract symbols.

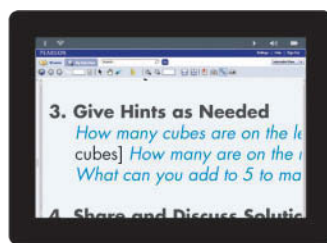

**Use in the Visual Learning Bridge** in the Student Edition and eText.

**Use in the Visual Learning Animation Plus** online.

**Rigor means ...**  
high-level, question-driven classroom conversations.

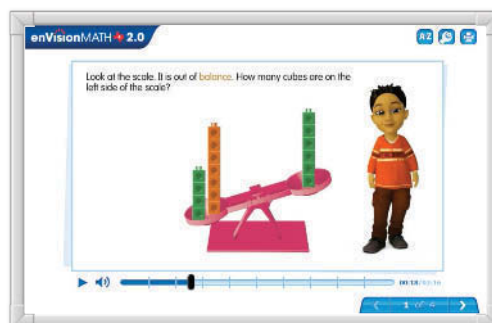

### Questions for Problem-Based Learning

**Facilitate learning** by using questions in the Teacher's Edition that help students understand the problem and by giving hints as needed, without telling students directly how to solve the problem.

### Questions for Visual Learning

**Focus on understanding** by using questions in the Teacher's Edition and in the Visual Learning Animation Plus that have students reflect on the work that is shown, make connections among ideas, and justify the steps.

**Rigor means ...**  
communicating often about one's thinking and work, using reasoning.

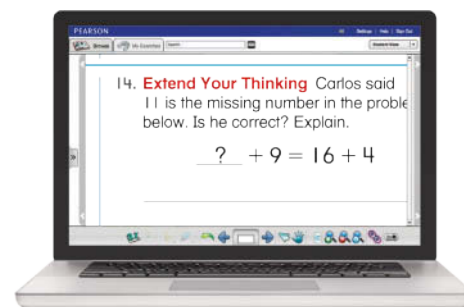

### During Instruction

**Share and Discuss Solutions** in the Teacher's Edition fosters communication during problem-based learning.

**Do You Understand** fosters communication during visual learning.

### During Exercises

**Lesson exercises** foster communication in ways consistent with the math process standards. Red words in Grades 3–5 are from the process standards.

### During Projects and Activities

**Rich communication** opportunities are in Math and Science Projects, Center Games, Math and Science Activities, Problem-Solving Reading Activities, Digital Math Tools Activities, and online Math Games.

## CONTENT TEKS CHANGES

### New content at Grade 1

For complete statements of these TEKS, see the TEKS Correlation in the Correlations tab.

#### In Number and Operations

- 1.2A Recognize quantities instantly.
- 1.2C Use expanded form to represent numbers.
- 1.2F Order whole numbers using open number lines.
- 1.3A Determine the sum of a multiple of 10 and a one-digit number.
- 1.2B, 1.3B Solve problems with an emphasis on composing and decomposing numbers.
- 1.4C Count by twos, fives, and tens to determine the value of a collection of pennies, nickels, and/or dimes.
- 1.5A Recite numbers forward and backward from any given number between 1 and 120.

#### In Algebraic Reasoning

- 1.5C Use relationships to determine the number that is 10 more and 10 less than a given number.
- 1.5E Understand the relationship represented by the equal sign.
- 1.5G Apply properties of operations when using fact families.

#### In Geometry and Measurement

- 1.6C, 1.6D Create and identify rhombuses and hexagons.
- 1.6F Compose 2-dimensional shapes by joining two, three, or four figures to produce a target shape in more than one way if possible.
- 1.6G Partition two-dimensional figures into two and four fair shares or equal parts.
- 1.6H Identify examples and non-examples of halves and fourths.
- 1.7 Select and use units to describe length and time.

#### In Data Analysis

- 1.8A Collect, sort, and organize data in up to three categories using tally marks or T-charts.

#### In Personal Financial Literacy

- 1.9A Define money earned as income.
- 1.9B Identify income as a means of obtaining goods and services, oftentimes making choices between wants and needs.
- 1.9C Distinguish between spending and saving.
- 1.9D Consider charitable giving.

---

### Deleted content at Grade 1

#### In Number and Operations

- Describe part of a set.

#### In Patterns, Relationships, and Algebraic Thinking

- Identify, extend, and create patterns of sounds, physical movement, and concrete objects.
- Find patterns in numbers, including odd and even.

#### In Geometry

- Describe fractional parts of a set.

#### In Measurement

- Order objects according to length, temperature, capacity, area, and weight.
- Order events according to duration.

#### In Data Analysis

- Identify events as certain or impossible.
- Construct real-object graphs.

## PROCESS TEKS CHANGES

### Modified Process TEKS

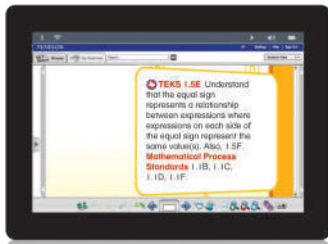

**Change** from “Underlying Processes and Mathematical Tools” at the end of the TEKS to “Mathematical Process Standards” at the start of the TEKS.

**Similar**, but not identical, to the previous process TEKS.

### Integration of Process TEKS

**Integrate process standards** because mathematical tasks often call for the use, coordination, and management of multiple mathematical processes.

**Process standards in a lesson** are listed at the start of the lesson.

**Problem-solving lessons** focus on math process standards.

**Problem-based learning** supports math process standards.

**Red labels in exercises** in Grades 3–5 are from the math process standards.

## THE STATE TEST

### More Rigorous

**Greater depth and cognitive complexity** with more applications and multi-step problems than the previous tests. *enVisionMATH Texas 2.0* tests have rigorous problems including multi-step problems than previous tests.

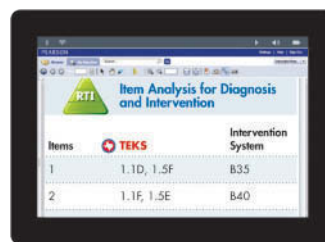

**Special wording** including questions with “NOT” and answers with “Not here,” “None of these,” or “All of the above.” *enVisionMATH Texas 2.0* items use these words.

### More Griddable Items

**Different grids** are used than on the previous tests. *enVisionMATH Texas 2.0* has griddable items in the assessments in print and online, at Grades 3–5.

### Assessing Process Standards

**Process and content standards are assessed together** in the same test items. In *enVisionMATH Texas 2.0*, the Item Analysis charts double code each item.

### Readiness and Supporting Standards

**75% of the test is on readiness standards** with 25% of the test on supporting standards.

## REPORTING CATEGORIES

### New Reporting Categories

**Categories that match the TEKS** are used for the state test. In *enVisionMATH Texas 2.0*, topics are color coded and organized around the reporting categories:

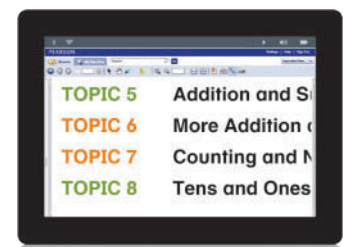

**Number and Operations**

**Algebraic Reasoning**

**Geometry and Measurement**

**Data Analysis**

**Personal Financial Literacy**

## ELPS IN A MATH PROGRAM

All lessons need to be sheltered to ensure students are making both content and language progress.  
—Jim Cummins

### English Language Proficiency Standards (ELPS)

**ELPS are to be implemented in mathematics** and other subjects so that classroom instruction integrates second language acquisition with quality content area instruction.

**Provide opportunities to listen, speak, read, and write** at a student's current level of English as part of effective instruction in second language acquisition. Gradually increase the linguistic complexity.

**English language proficiency levels** of Beginning, Intermediate, Advanced, or Advanced/High may vary for listening, speaking, reading, or writing for a given student.

### ELPS Specified in Math

**The required ELPS** for a Texas elementary math program are shown in the chart at the right.

For statements of those ELPS in a correlation from ELPS breakouts to lessons, see the Correlations tab.

## ELPS IN ENVISIONMATH TEXAS 2.0

### ELPS Support in 100% of the Lessons

**The first page of each lesson** in the Teacher's Edition provides support for one or more ELPS for students at Beginning, Intermediate, Advanced, and Advanced/High levels of English language proficiency.

This support ensures students are making annual progress in learning English as measured by TELPAS, the Texas English Language Proficiency Assessment System.

**ELPS Toolkit** is a booklet for teachers that provides additional suggestions for supporting English language learners.

### Overview of ELPS by Topic

**The ELPS given focused attention in each topic** of *enVisionMATH Texas 2.0* are shown below.
