- **Horticulture**
  - Plant Identification, parts of plant and their functions, planting & caring for young plants, greenhouse management
- **Floral Design**
  - creating floral designs for sponsors, history of floral, principles & elements of design, wedding planning, floral enterprises
- **Advanced Plant & Soil Science**
  - Identify plants /flowers , plant diseases & pests, soil science, growing & caring for young plants in the greenhouse, landscaping, planting trials

Being in an Ag class also makes you an FFA member where you can choose to be on judging teams, raise livestock, build ag mech projects, become an officer, win scholarships and much more! Being a member of this organization is also great because you can put it down as an activity on scholarships in the future.
