Rice Consolidated HS Audio/Visual

A/V Mission:	Our mission is to inspire and empower students through hands=on learning in audio and visual production, fostering creativity, technical skills, and collaboration. Our program is dedicated to preparing students for the future by providing real-world experiences, promoting innovating thinking, and cultivating a passion for storytelling through cutting-edge technology and media arts.
Freshmen:	Learn basic skills related to equipment operation of video cameras, framing shots, adjusting focus, and setting exposure. Gain an understanding of how microphones, soundboards, basic recording equipment, and lighting works.
Sophomores and Juniors:	Develop skills relating to software programs, video editing, along with refinery of skills from freshmen level.
Seniors:	Direct and produce major school productions. Mentor the younger learners in the basics for increased synergies within the department. Collaborate on ideas and projects for new and original content that helps to build our A/V department's visibility within the school. Delegate duties to underclassmen pertaining to the successful execution and development of targeted projects within the department.
All:	All students will leave the audio/visual department at Rice Consolidated High School with the full capability to complete our mission statement.

Things to consider when choosing A/V

Audio/Visual is an intense set of 4 year long courses in which you will be expected to be creative, reliable, and skilled in the areas of audio and visual production. Students will be able to raise their personal profile on the campus by being somewhat of a “local celebrity”, all the while using their status to elevate the overall profile of the entire campus and student-body. Due to the demands, limits, and time needed to dedicate towards being a contributing member of this incredible program.
