

Art II, Ceramics I Syllabus

Course Description/Goals:

Art II, Ceramics I (3D Ceramics/Sculpture) This course is a continuation of the use of the elements and principles of design in three dimensional issues. Students will be provided an opportunity to work in ceramics, sculpture, and three dimensional mixed media while gaining an understanding of self and others through creative expression. This course may require an Art fee.

Course TEKS/Objectives:

The **high school art TEKS (Texas Essential Knowledge and Skills)** are organized into four core strands: **Foundations (observation and perception), Creative Expression, Historical and Cultural Relevance,** and **Critical Evaluation and Response.** Students explore their surroundings, experiences, and cultures to create and reflect on original artworks.

By engaging in the artistic process, students develop visual literacy, cultural awareness, problem-solving skills, and the ability to make informed, creative decisions—skills essential for lifelong learning and success. Each category contains specific standards (TEKS) that students are expected to master.
