

Amherst Central School District

Anthony J. Panella
Superintendent

Lynn Shanahan, Ph.D.
*Assistant Superintendent
Curriculum, Instruction & Technology*

Michael Belle-Isle
*Assistant Superintendent
Student & Staff Services*

August 12, 2025

Dear Amherst Central High School Parent/Guardian,

As a district, we are committed to the safety and education of all our students and we also want to clearly communicate with parents about our learning environment.

The Amherst Central School District is in compliance with regulations issued by the New York State Department of Health (NYSDOH) requiring all school districts and Boards of Cooperative Educational Services (BOCES) to test potable water fixtures used for drinking or cooking purposes for lead contamination, to remediate contamination, and to notify parents of children and the public of test results. Levels of lead at any water outlet above 5 parts per billion (ppb) require action to remediate this issue and trigger notification requirements. 2022 revisions to the Public Health Law (PHL) reduced the lead action level in drinking water from 15 parts per billion (ppb) to 5 ppb and reduced the compliance testing cycle to a triennial (every 3 years) schedule. The first compliance testing period is 2023-2025 under the revised PHL.

As required, the Amherst Central School District tested all water sources required to be tested in every school building per NYSDOH regulations. Non-applicable outlets such as bathroom sinks and tempered outlets (blended hot/cold) that are not required to be tested have been identified with appropriate signage stating "Caution - Non Potable Water - Do Not Drink".

Consistent with regulatory requirements, first draw water samples were taken after letting the water remain motionless in pipes for a minimum of 8 hours and a maximum of 18 hours.

I am writing to share the results we received for the second round of testing at Amherst Central High School.

In total, 4 samples were collected at Amherst Central High School with 3 samples exceeding the threshold of 5 ppb, as follows:

- Room 316 - Left Sink
- Room 316 - Right Sink
- Girls Varsity Locker Room Drinking Fountain

In response to the receipt of these test results, the water outlets that exceeded the testing level continue to remain out of service. The next step is to develop a remediation plan that will be approved and guided by the experts in the field of water remediation. It is important to note that none of the

sources will be put back into service and available for drinking or cooking until the sources are fully mitigated, re-tested and meet NYSDOH Standards.

The water testing results are available on the District website at www.amherstschools.org under Departments / Facilities. For more information about water quality and sampling for lead you may want to contact the Erie County Department of Health at (716) 961-6800. Should you have any questions or concerns, please contact Mark Rampado, ACSD Director of Facilities, at (716) 362-8151 or email, mrampado@amherstschools.org.

Sincerely,

A handwritten signature in black ink, appearing to read "Anthony J. Panella". The signature is fluid and cursive, with a long horizontal stroke at the end.

Anthony Panella, Superintendent of Schools
