

## NOVI HIGH SCHOOL

### WHY DOES NOVI HIGH SCHOOL NEED TRANSFORMATION?

As our flagship building, Novi High School has seen decades of additions that have been built in reaction to our steady growth as a district. In spite of this, the building has areas that are some of the oldest in the district and do not match the standard of excellence our students deserve. This is an opportunity for us to connect our high school footprint with intentionality in preparation for the future. This proposal provides our community with a high school that has a holistic, unified design that helps support our mission of empowering students through learning spaces. The 2025 Bond Proposal will reimagine the building from the ground up and include these key projects:

- New academic innovation hub, event commons, and skylight atrium
- New multi-sport courts, an indoor track, a turf field, a natatorium, and a competition gym
- Performing arts lobby addition and extensive auditorium remodel
- Expansion and remodel of the Black Box Theatre and band/orchestra rooms

## NOVI K-8

### WHY ARE ADDITIONS AND IMPROVEMENTS NECESSARY?

We want our students to have world-class learning facilities, whatever building they attend in the district. In addition, we want students to experience continuity in our programs and physical sites as they progress through our district. As buildings age and student needs evolve, K-8 additions and improvements will allow the district to continue its mission to focus on student potential by creating consistent, inspiring spaces across buildings. Key projects include:

- Elementary classroom additions, extensive remodeling, and playground improvements
- Middle school STEM addition, secure athletic wing entrance, new turf field, and concessions complex

## BUSES, FURNITURE, FIXTURES, EQUIPMENT, & TECHNOLOGY

### WHY ARE THESE INVESTMENTS IMPORTANT?

As learning and student spaces continue to change, the tools and environments that support students must keep pace. The 2025 Bond Proposal includes updates to classroom furniture, technology, transportation, and equipment to better support collaboration, accessibility, and modern instruction. Investments include:

- Equip learning spaces with smart technology and modern furniture
- Provide the necessary equipment to create supportive environments
