

## **Region 12 School District Triennial Assessment Summary**

**6/2025**

Region 12 completed the Triennial Assessment of the school district Wellness Policy and practice. This summary compares the effectiveness of the policy as compared to a model policy and will also indicate how well the district practice complies with the policy and required regulations.

Region 12 School District meets most wellness federal requirements however our Wellness Policy should be updated to reflect the practices we follow such as protecting the privacy of students who qualify for free or reduced meals and providing continuing education to nutrition program staff.

The district policy will be revised next school year to include other areas where practice is aligned with the requirements, but the policy needs to be modified.

The district will improve its practice by focusing on the areas identified on the Triennial Assessment such as providing this report to the public, and clarifying the requirement for foods or beverages sold or served to students after the school day.
