

## **Facilities and Grounds Update – August, 2025**

Since mid-June, our Facilities staff has been working diligently to prepare the new PVS building for occupancy. This work includes countless behind-the-scenes details that are easy to overlook but essential for a functional space—installing trash cans, paper towel and toilet paper dispensers, and setting up appliances throughout the building.

We've also been moving and rearranging furniture based on staff requests to ensure the space meets everyone's needs. In addition, we've provided support to the Food Service and Athletics departments during their transitions into the new facility, and we're currently assisting the Music Department as they get settled.

Our team has attended multiple training sessions over the past few weeks to familiarize ourselves with the systems being turned over to us, ensuring a smooth handoff and ongoing support.

Beyond PVS, we've been reallocating and moving repurposed furniture from the middle and high schools to elementary schools to help them meet their current needs. Lastly, we're excited to welcome two new team members to our department—they've hit the ground running and have already proven to be valuable assets.
