Section	7000 Students
Title	Use of Internet-Enabled Devices During the School Day
Code	7316
Status	Active
Adopted	July 24, 2025
Last Reviewed	July 1, 2025

SUBJECT: USE OF INTERNET-ENABLED DEVICES DURING THE SCHOOL DAY

The District consulted with local stakeholders including employee organizations representing each bargaining unit, parents, and students to develop this policy to prohibit the use of Internet-enabled devices by students during the school day on school grounds. This policy aims to ensure that students remain focused on their academic responsibilities throughout the school day, which includes all instructional and non-instructional periods such as homeroom, lunch, recess, study halls, and passing time.

For purposes of this policy, the following definitions apply:

- a) "Internet-enabled devices" means and includes any smartphone, tablet, smartwatch, or other device capable of connecting to the Internet and enabling the user to access content on the Internet, including social media applications;

"Internet-enabled devices" does not include:

1. Non-Internet-enabled devices such as cellular phones or other communication devices not capable of connecting to the Internet or enabling the user to access content on the Internet; or
 2. Internet-enabled devices supplied by the District, charter school, or Board of Cooperative Educational Services (BOCES) that are used for an educational purpose.
- b) "School day" means the entirety of every instructional day as required by subdivision 7 of the Education Law Section 3604 during all instructional time and non-instructional time, including but not limited to homeroom periods, lunch, recess, study halls, and passing time.
- c) "School grounds" means in or on or within any building, structure, athletic playing field, playground, or land contained within the real property boundary line of a district elementary, intermediate, junior high, vocational, or high school, a charter school, or a BOCES facility.

Students are generally prohibited from using Internet-enabled devices during the school day anywhere on school grounds.

However, students may be authorized to use an Internet-enabled device during the school day on school grounds:

- a) If pre-approval from the building principal is granted
- b) Where necessary for the management of a student's health care;
- c) In the event of an emergency;
- d) For translation services;
- e) On a case-by-case basis, upon review and determination by a school psychologist, school social worker, or school counselor for a student caregiver who is routinely responsible for the care and well-being of a family member; or
- f) Where required by law.

Students must be permitted to use an Internet-enabled device where the use is included in the student's:

- a) Individualized Education Program (IEP); or
- b) Section 504 Plan.

On-Site Storage of Internet-Enabled Devices Including Cell Phones

The District shall provide at least one method for students to store internet-enabled devices on-site during the school day. Storage options may include but are not limited to the following: a central collection and disbursement process if and only if the creation of that process does not take away from instructional time or increase labor cost. In the absence of a central collection and disbursement process, student lockers at grades 6-12 will be used for storage, and if that is enacted, effectiveness of that solution will be evaluated over time, and a central collection and disbursement process will continue to be studied, if needed. Students in grades UPK-5 will use lockers or equivalent under adult supervision for storage.

The District will communicate the procedures for storing and retrieving devices, ensuring that students understand their responsibilities in using the on-site storage facilities provided.

It is the student's responsibility to care for the storage area and ensure it is not damaged.

Methods for Parents to Contact Students During the School Day

To accommodate necessary communication, parents or persons in parental relation may use the following methods to contact their student during school hours while adhering to this policy:

- a) School Office Phone: Parents or persons in parental relation may call the school's main office, and the office staff can relay messages to the student or call the student to the office to speak with their parent or person in parental relation.
- b) Classroom Intercom System: In case of an emergency, the school's main office can use the classroom intercom system to notify students directly or ask them to come to the office.
- c) Written Notes: Parents or persons in parental relation can drop off written notes at the school's main office, which can then be delivered to the student by school staff.

Parents and persons in parental relation will be notified in writing of the methods that are available for contacting their student during school hours upon enrollment and at the beginning of each school year.

Student Discipline for Accessing Internet-Enabled Devices During the School Day

Students who violate this policy may be subject to disciplinary penalties pursuant to the District's Code of Conduct and subject to applicable law and regulations. Progressive discipline or restorative practices may be used in cases of repeated violations, consistent with the Code.

Posting and Translation of Policy

The District will post this policy in a clearly visible and accessible location on its website. Translations of the policy into the 12 most common non-English languages spoken by limited-English proficient individuals in the state will be provided upon request by a student or other persons in parental relation to a student.

Reporting and Mitigation Action Plan

Beginning September 1, 2026 and annually thereafter, the District will publish an annual report on its website detailing enforcement of this policy within the District in the prior school year. This report will include non-identifiable demographic data of students who have faced disciplinary action for non-compliance and analysis of any demographic disparities in enforcement of this policy. If a statistically significant disparate enforcement impact is identified, the report will include a mitigation action plan.

Liability:

Red Creek will not be liable for the loss, damage, misuse, or theft of any personal technology brought to any of its locations. The District reserves the right to monitor, inspect, and/or confiscate personal technology or internet enabled devices when the administration has reasonable suspicion to believe that a violation of school policy or criminal law has occurred.
