

# Sierra Middle School

## Device Training for Parents and Students

# Digital Devices

- Chromebook
- Bring Chromebook to school everyday **charged and ready** for use.

# Purpose

- Support academic learning
- Expand school to home communication and learning
- Access information
- Prepare our students to be college and career ready

# Responsibility of Students

- Handle Chromebooks with care.
- Carry device with the lid closed and use two hands.
- Keep track of device.
- Keep liquids away from device.
- Be sure there is nothing on the keyboard when closing the device
- Only handle your device.

# Digital Responsibility

- Access is a privilege, not a right; general rules of school behavior apply. Just as students are responsible for good behavior in a classroom, they must also be responsible when using school computers, networks or technologies.
- It is the joint responsibility of school personnel and the parent or guardian of each student to educate the student about his/her responsibilities and to establish expectations when using technology.

# Time for Concern

- Too much social media
- Not wanting to come to school
- You have not seen the device for a day or longer
- Grades slip
- Child does not go outside

- Safety feature implemented into district-owned devices such as your chromebooks.
- Notifies administration of any items typed on the Chromebook where students' safety is at risk such as self-harm (ie. students typing into their chromebook, "I want to kill myself").
- GoGuardian is there for safety reasons, but if someone is playing around typing information to be silly, there will be consequences.

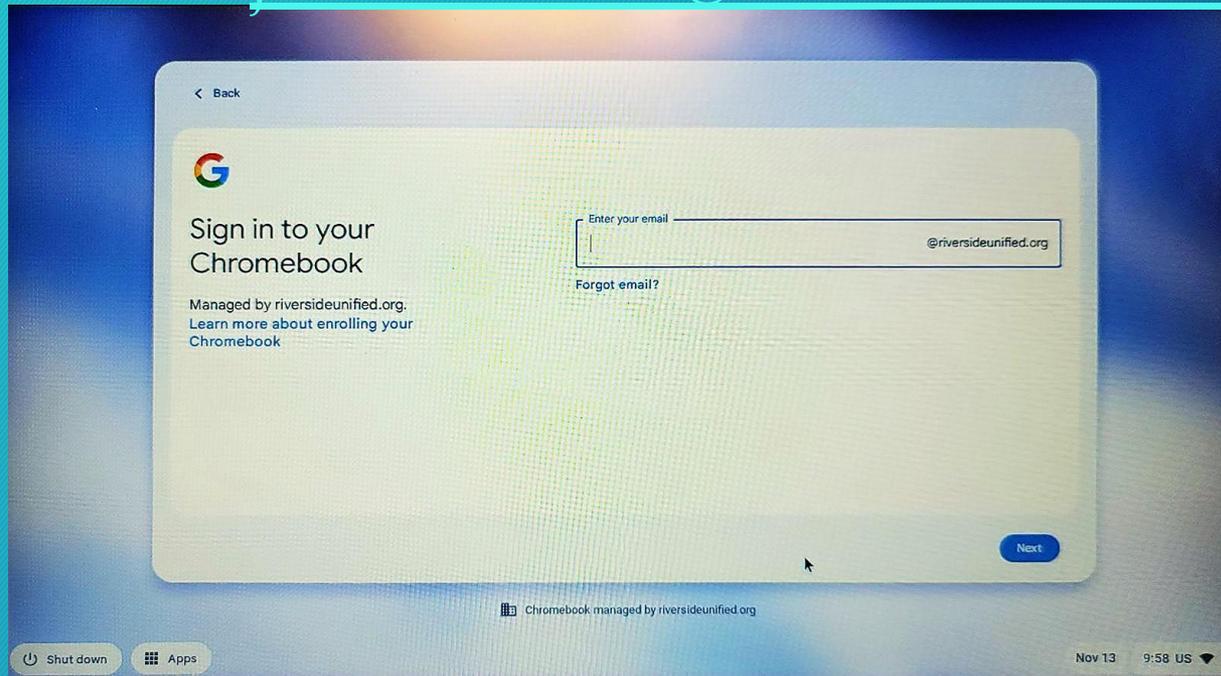

# Care and Maintenance

- Inspect units regularly.
- Issue or problem, bring it to Mr. Aguirre in the library.
- Do not transport it in a backpack with heavy objects or any form of liquids.

# Chromebook Login

- Students login using their RUSD email account.
- Username- First Name + Last Name + Last 3 digits of student I.D . If my name is John Smith 123456, my login would be johnsmith456@riversideunified.org
