Cello

Bass

Music Moves Us!

- **Art (6th, 7th and 8th grades; semester):** Students will engage in a fun, challenging, hands-on exploration into the world of visual arts. Students can expect to learn basic drawing and painting techniques, color theory, 3d sculpture, multi-media, print media, and sketchbook organization over the course of the semester.

STEM (6th, 7th and 8th grades; semester)

6th Grade – Photography, coding, stickers and lots of hands-on builds in the shop. 6th grade is a fun introduction to STEM at Whatcom

7th Grade – Try it all! Hands-on builds, video editing, coding, interior design, 3d printing. You'll get introductions to many different STEM related fields.

8th Grade – It's all about tools. High tech tools, like the vinyl cutter, laser cutter, and 3d printer fill half of the semester. Hands-on building projects using power tools in the shop finish off the semester.

Plant Science (7th and 8th grades; semester): Do you love being outside and working with plants? In Plant Science, students learn about plant identification, crop production, and how plants are used for food, medicine, crafts, and landscaping. They will also learn about local plant growers, our region's natural resources, and our general PNW environment. The learning labs will be our school garden and greenhouse spaces, where the kids will get hands-on experience!

Complete your enrichment choice form before you log off today.

- ☑ Step 1: Go to your email to find the link
- ☑ Step 2: Open the form and make your selections
- ☑ Step 3: Hit “submit!”

IMPORTANT TO KNOW:

- You are choosing your enrichments for all year, both semesters.
- We do our best to schedule your top choices, but it is possible you will be scheduled in an alternate enrichment.
- **Some enrichment choices may change!**
