19th Century Romantic Music

As the Classical Era gave way to the Romantic Era, music underwent great changes. A desire for order and symmetry was replaced by the need to express strong emotions. The personality, thoughts and feelings of the artist as an individual came to the fore, and subjectivity took over for objectivity. New genres dominated – the short lyric piano piece, the symphonic poem, the song cycle – alongside the continuing tradition of the symphony, string quartet and sonata. We'll look at the life and music of a different composer of this stimulating musical era each week. Schubert, Schumann, Brahms, Chopin, Liszt and more!
