RE: Subscriber fees for use of City 800mHz Trunked Radio System

Rae Anne,

The interlocal Agreement (C2200173) between the City of Bellingham and the Bellingham School District allows for an annual review of the subscriber rate charged for use of our system. We are required to notify you of any change of rate for the next year by September 1 of the previous year. This letter serves as notification that we intend to increase the subscriber fees for 2023. Please refer to Section 3.1 of that agreement for any clarification.

The initial rate of \$20.00 per month / per radio was a starting place, and a rate I insisted we stick to as it was previously approved by my supervisor and verbally passed on to you as the beginning rate for use of our system.

It has become clear that due to increases in costs of equipment and maintenance on the system, and comparisons to the rates charged by similar private and public systems, we need to introduce an increase in that fee for 2023. We have decided to implement an increase of 25% for 2023; the maximum increase allowed by the ILA. The new rate for 2023 will be \$25 per radio / per month.

That amount will be invoiced to you in January for the 126 radios in use. Between now and then, our contracts staff will be in touch with an amended interlocal agreement for your signature. As we are amending the document, we would like to take the opportunity to update any contact information that may be out of date. Please check that information on the attached copy of the ILA and let me know if any updates are required.

Also attached please find a current inventory of your subscribers as listed in the systems database. Please work with your radio service vendor to validate its accuracy. We can make any required adjustments prior to billing in January 2023.

Efforts are still underway to develop a governance model that will bring the City of Bellingham, Whatcom County, and Whatcom Transit Authority under one agreement to combine resources for the development of a county-wide radios system that will serve all of public safety. This is envisioned as an expansion of the current City system you are operating on today, and will add more sites resulting in better coverage, capacity, and interoperability for all users. It is my hope that we will see significant progress in this effort over the next year

Please don't hesitate to contact us with any concerns or questions about the system, its performance, or any other questions you may have.

Sincerely,

William Hanes
