Terms to Know

Curriculum

The curriculum is the components that comprise a course of study. At Holden School District, our written curriculum for each course includes:

- Essential Learning Outcomes (based on state standards)
- Pacing Guide
- Units of Instruction (Including rubrics and assessments)

Priority Standard

Prioritized Standards are those that have been identified by the state as the most essential to a particular grade level, content area, or course. While identified as most essential, priority standards are only effective when paired with supporting Missouri Learning Standards.

Missouri Learning Standard

The Missouri Learning Standards define the knowledge and skills students need in each grade level and course for success in college, other post-secondary training, and careers.

ELO

The Essential Learning Outcomes define the knowledge and skills gained from a course, providing a framework to guide students' cumulative progress. Essential learning outcomes are made at the District level and aligned with Missouri Standards. (i.e. I can...)

Pacing Guide

A pacing guide is a written schedule or chart displaying the topics/skills of an education unit or curriculum to be addressed over a defined period of time.

-A.K.A. Curriculum Map, Scope and Sequence

Rubric

A rubric is an evaluation tool or set of guidelines used to promote the consistent application of learning expectations, learning objectives, or learning standards in the classroom, or to measure their attainment against a consistent set of criteria.

-A.K.A. Scoring Guide

Assessment

An assessment is the way that a teacher will assess proficiency on a topic.

- *Formative*: a low- or no-stakes, informal method that is used to check for student understanding throughout a unit and is used to adjust instruction
- *Summative*: a formal method to evaluate learning by comparing a standard to a rubric

UOI

The Unit of Instruction is a compilation of all resources, lessons, activities, assessments, etc. that will be used in order to facilitate learning over a particular topic or objective.
