

Karina Espinoza Leiva:

Good afternoon, gentlemen of the District, my name is Karina Espinoza Leiva and I am the mother of a 5th grade student at Spruce School. I would like to leave my comment about the problem that is being experienced at Spruce School in the 4th and 5th grade classrooms with reference to reducing the number of students in the classrooms to improve the quality of learning of the students. Personally, I see the need. since it would be much better educational performance for students. They would receive better care.

Janet Juarez:

Overcrowding in classrooms can be a significant factor for the learning and development of our children and also taking into account the exhausting challenge as a teacher that this implies, our children have the right to a healthy and quality education and our teachers support them so that A surplus of students does not imply an overload of work for them. The proposals may be to open teaching positions, have the support of substitute teachers and/or provide the space of another classroom for students, this in terms of health can limit infections, maintaining rules within a classroom, that the material be shared and used according to the number of students, to have teachers without this overload and who can maintain order and monitoring. Every child deserves an education in an environment that guarantees their academic development and learning.
