

### ***Construction Update 8/19/25***

This summer there was significant activity on site to construct our new 182,000 square foot PreK-12 school. The progress of construction on site is moving from the south side (near Crestview Road) to the north side (near the stadium).

Notable accomplishments include the following:

- Concrete floors are poured for 80% of the project
- Exterior masonry block walls are 80% complete
- Steel erection is complete for all of the academic wings
- Roofing is complete for 70% of the building

On the interior of the building, several trades are working concurrently to complete the rough-ins for plumbing, electrical and HVAC connections. Framing of the interior walls is completed in the Student Dining areas, Pre-school, Kindergarten and 1<sup>st</sup> floor Elementary and Middle School areas.

Over the coming months, you will notice significant exterior work occurring on the north end of the site. This includes construction of the Performance Gym and supporting athletic areas including the locker rooms. Steel erection will occur in this area, followed by masonry block walls. On the inside of the building, interior framing and utility rough-ins will continue to move through the High School area and into other portions of the north end of the building. Installation of the exterior brick veneer will continue, with an important goal of reaching building enclosure towards the end of the year.

We are on target to open the new building mid-year to students in grades 5-12 this will occur after winter break of the 2026-2027 school year. The elementary grade levels will transition to the new school at the start of the 2027-2028 school year. It is important to note that though the new building will be open to our middle and high school students in January 2027, our campus will still be in transition as we demolish the existing Middle/High School building. This will be followed by additional site work installing the final parking lots and drives. The campus will be in its final configuration by August of 2027.
