

SECURLY FLEX AT MARSHFIELD HIGH SCHOOL

| | |
|---------------------|--|
| WHAT? | Through the use of Securly Flex App, students are provided an opportunity to customize their daily schedule by selecting 30-minute flex activities offered by the student's academic teachers. Likewise, professional staff can use Securly Flex to request students for required instructional time, remediation, re-teaching content, conferencing, and more. Students and staff will use Securly Flex daily, to ensure flex periods 4A-4B and 4C are scheduled accordingly, including when students are assigned a 30 minute lunch period. Knowing that individual student needs, interests, course content and demands may change throughout the school year, Securly Flex App provides students and staff a flexible approach to supporting all learners. |
| WHEN? | Students are required to sign up for "flex" offering/s, daily before 9:30 AM. There will be a daily reminder for students to do so. |
| WHERE? | Reporting location is dependent on student's schedule, assigned teachers and the offering selected. |
| HOW IT WORKS | Students log into Securly Flex App and sign up for available "flex" offerings each week. Teacher requests will be prioritized over student selections. Students who do not select flex offerings will be automatically assigned a location. |

EXAMPLE 1: STUDENT VIEW (FLEX, SKINNY, LUNCH)

Indicates the specific **date** the student is viewing. Students can sign up days in advanced to plan accordingly.

Indicates the **flex period** and the offered **activities** available for selection during that flex period.

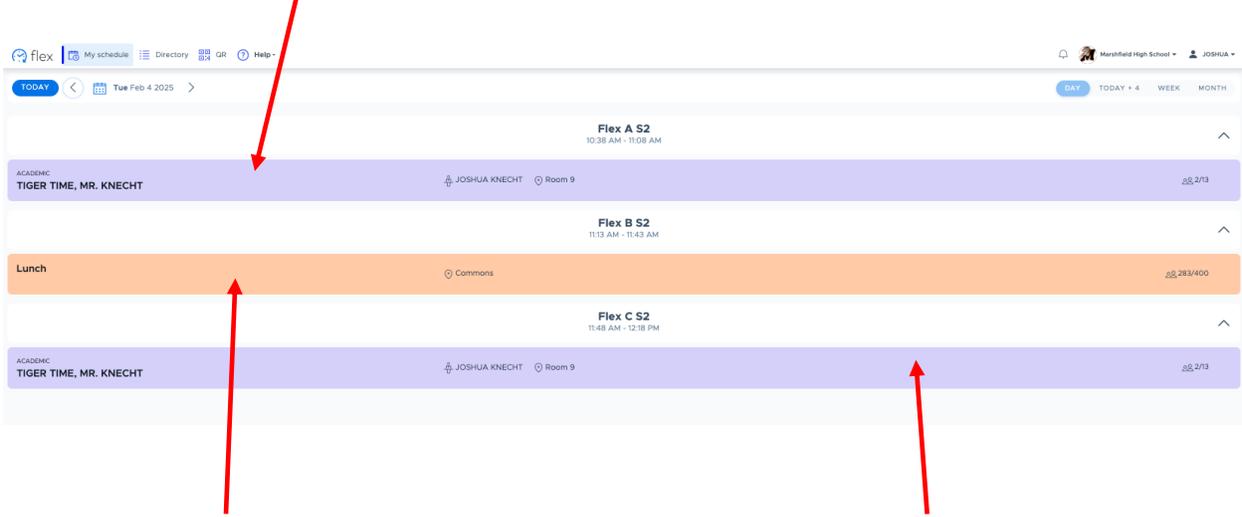

The "**blue check mark**" indicates the **student selected** that activity for Flex A. In this example, the student was provided five (3) different flex offerings to choose from.

This is a **required 30 minute "skinny" class**. The student is not provided any other options and therefore is required to report to this class.

In this example, the student would be assigned a **30-minute lunch period** during Flex C.

EXAMPLE 2: STUDENT VIEW (TIGER TIME, LUNCH, TIGER TIME)

In this example, the student is required to report to their **Tiger Time** teacher and location for **Flex A**. As you can see in the example, the Tiger Time teachers name and location are included on the title of the required activity.

In this example, the student would be assigned a **30-minute lunch** period during **Flex B**.

In this example, the student would report back to their **Tiger Time** teacher and location for **Flex C**.

EXAMPLE 3: STUDENT VIEW FROM SECURLY FLEX (UNREGISTERED)

Note: During the daily morning announcements at 9:15 AM, students will be reminded to log into Securly Flex and confirm that they have registered for their selected Flex offerings. Students who **remain unregistered for any Flex offering will be automatically assigned a reporting location** and are required to report to that location during the respective Flex period.

In this example below, the student remained unregistered for flex C, so they were assigned a reporting location.
